## Did You Know?

ATAS International, Inc. offers a lightweight, easy to install standing seam panel that doesn't need any extra caps, strips or clips. The panels' seam and lock are an integral part of the system to prevent blow-off or creeping of the seam.

### Features

- Cost effective
- Clip less, one-piece, standing seam panel
- Wind-Lok™ positive-interlock feature
- Precision leveled prior to forming
- Concealed fastened through pre-punched slots that allow for expansion and contraction
- Complies with the International Building Code (IBC) requirements
- Standard widths of 12" and 16"
- 1-1/4" seam height
- Smooth texture
- .032 aluminum or 24 ga metallic coated steel
- Over 30 stock colors available plus custom colors
- Roof, mansard, fascia and equipment screen are typical applications
- Complete line of accessories and trims also available
- Panel length
  - Aluminum maximum 20'-0"
  - Steel maximum 25'-0"
