HTM71 Cabinets

Base Units

BU455

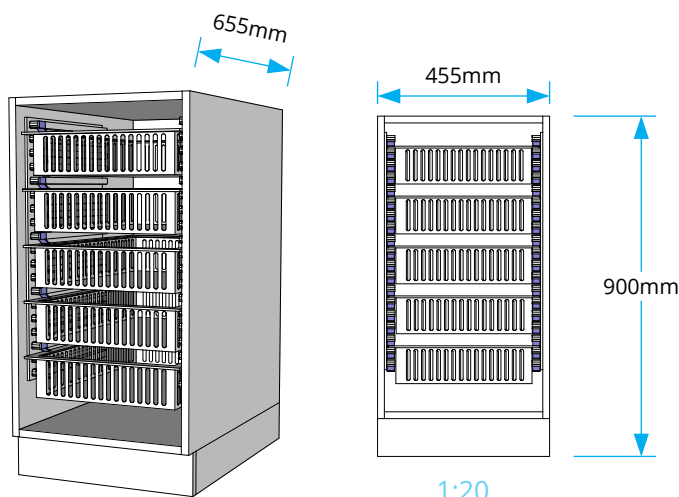

Medspace units are designed and constructed to be fully compliant with the HTM71 standard. The units are pre-fitted with integral liners to enable tray and shelf options to be fully utilised. Trays are fully adjustable and arrestable. When in the arrested position the trays are tilted allowing improved accessibility. Carcasses are manufactured from white or light grey 18mm thick melamine faced chipboard with edging as required. Units are fitted onto adjustable feet with a matching 100mm plinth. Base units can be complimented with a fully compliant laminate or solid surface worktop with integral upstand.

Width: 455mm
Depth: 655mm
Height: 900mm

Add 18mm to depth if doors are required. Door fronts manufactured from melamine faced chipboard including 2mm profiled PVC edges. Doors supplied with exposed axle 250° hinges to allow maximum tray extension. Locks are included with doors as standard and available in split and single options.

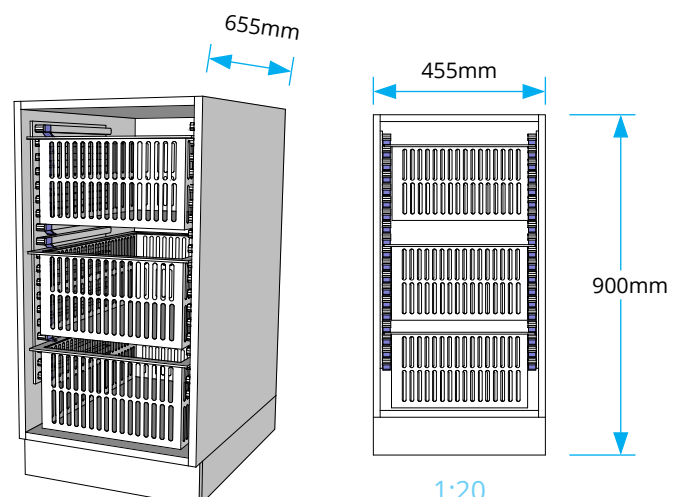

BU455 Configurations

BU455-01

Unit to contain:

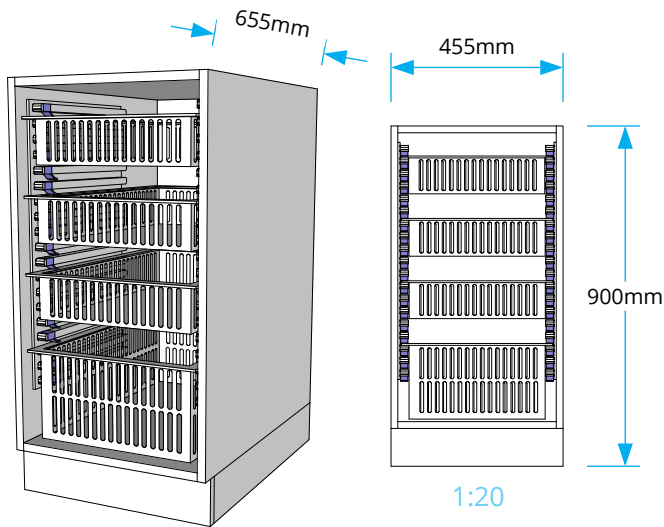

5 x 100mm deep clear plastic trays on liners

BU455-02

Unit to contain:

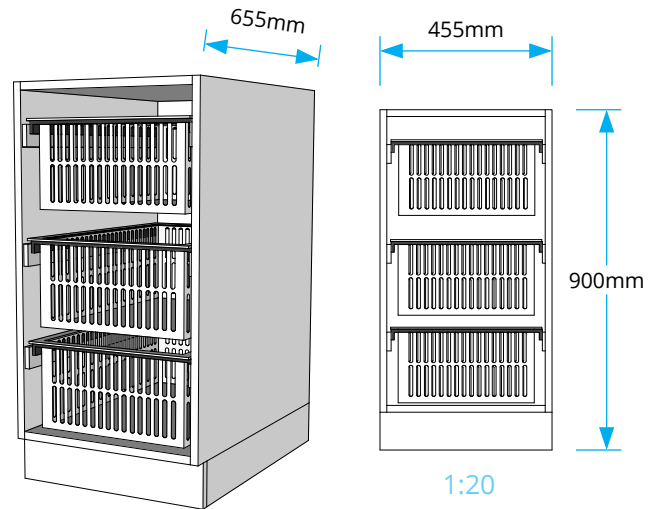

3 x 200mm deep clear plastic trays on liners

BU455-03
