HISTORY OF THE BRAND

The well-known Dutch cyclist Rini Wagtmans, rode the French Alps and Pyrenees several times during his professional career. In the Tour de France this brought him once the yellow jersey, three stage wins and a fifth and sixth place in the general classification. He rode all his races with old acrylic jerseys. Perspiration and rain made this outfit uncomfortable, soaked and very heavy. With his experience and an eye for innovation, Rini searched for improvement for the current generation sportswear. His search brought him in Italy. There he discovered a technology that would turn-around the world of sportswear. He imported the revolutionary technology to the Netherlands and there and then, Rogelli Sportswear was born and became trend setter in the cycling sport. Not much later, other branch of sports reported themselves interested.

Meanwhile Rini Wagtmans transferred the company to his son Marijn Wagtmans. Until now, Rogelli Sportswear still attends the process from the first thread, to the fabric and to the consumer. The most important mission of Rogelli Sportswear always remains to make top-quality sportswear reachable for every athlete.

ROGELLI TECHNOLOGIES

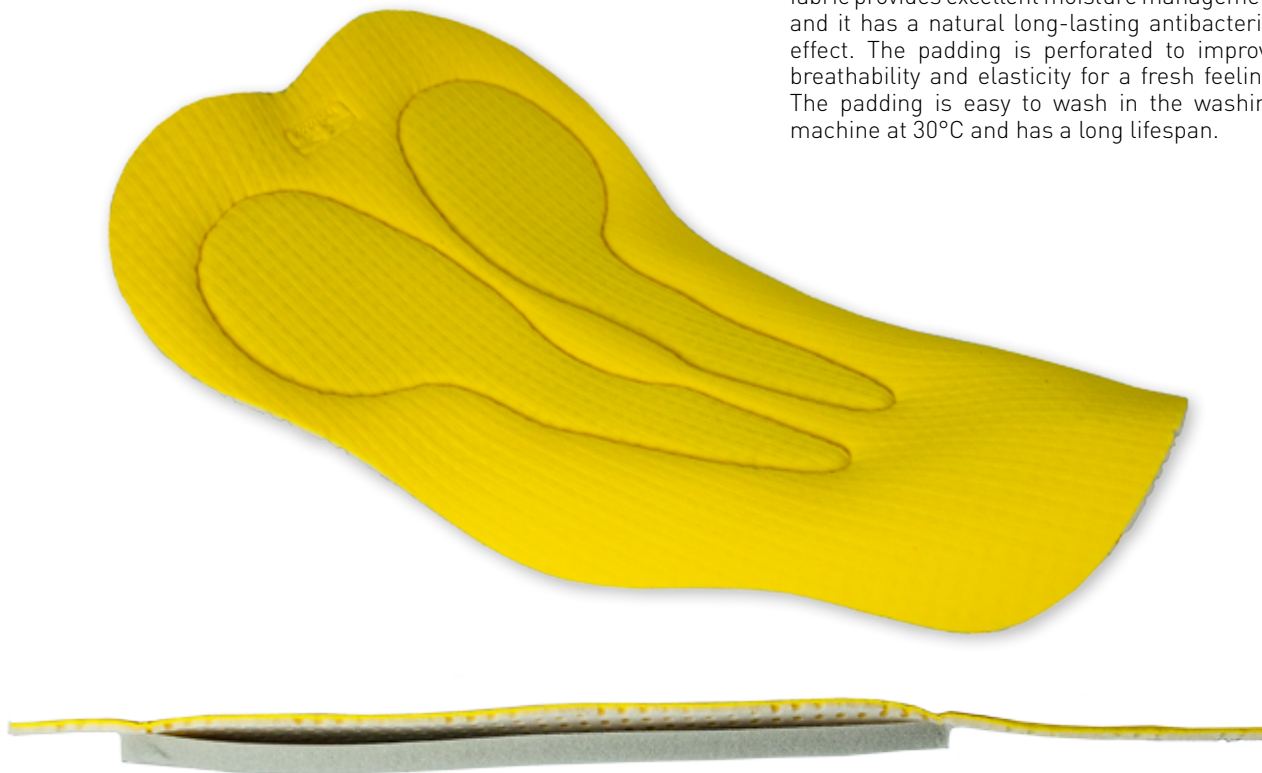

ROGELLI SEAT PADS

MEN ENDURANCE HD2 PADDING

The Endurance HD2 padding for men is designed by Elastic Interface Technology for long distances and approximately a 5 hours span. The Endurance HD2 padding has centrally sewed inserts and is made of a new generation high density foam. The application of an innovative anatomically shaped design specifically for men provides a perfect fit. The fabric provides excellent moisture management and it has a natural long-lasting antibacterial effect. The padding is perforated to improve breathability and elasticity for a fresh feeling. The padding is easy to wash in the washing machine at 30°C and has a long lifespan.

ROGELLI PADDINGS MEN

MEN HP03 PADDING

The HP03 padding for men is specially designed by Rogelli for short and medium distances and approximately a 2 hours span. The padding consists of several layers, which have a thermo-regulating effect for maximum comfort. The COOLMAX® fabric is a trademark of INVISTA®. It provides excellent moisture management and it has a natural long-lasting antibacterial effect. The application of an innovative anatomically shaped design specifically for men provides a perfect fit. The variable thickness of the padding increases comfort and provides alleviation on the pressure points. The padding is easy to wash in the washing machine at 30°C and has a long lifespan.

suggested ride duration

MEN HP04 PADDING

The HP04 padding for men is specially designed by Rogelli for medium and long distances and approximately a 3 hours span. The padding consists of several layers, which have a thermo-regulating effect for maximum comfort. The COOLMAX® fabric is a trademark of INVISTA®. It provides excellent moisture management and it has a natural long-lasting antibacterial effect. The application of an innovative anatomically shaped design specifically for men provides a perfect fit. The variable thickness of the padding increases comfort and provides alleviation on the pressure points. The gel inserts reduce vibration while cycling. The padding is easy to wash in the washing machine at 30°C and has a long lifespan.

suggested ride duration

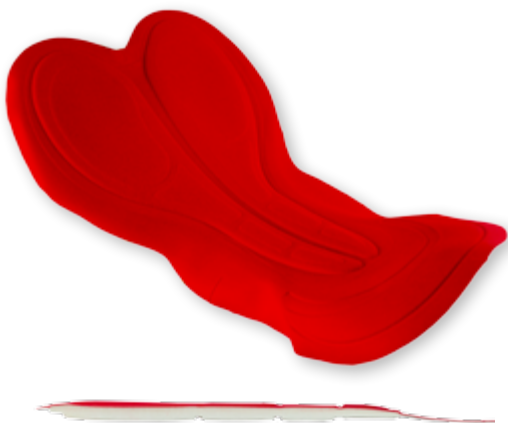

MEN HP05 PADDING

The HP05 padding for men is specially designed by Rogelli for medium and long distances and approximately 4 hours span. The padding consists of several layers, which have a thermo-regulating effect for maximum comfort. The COOLMAX® fabric is a trademark of INVISTA®. It provides excellent moisture management and it has a natural long-lasting antibacterial effect. The application of an innovative anatomically shaped design specifically for men provides a perfect fit. The padding is perforated to improve breathability and elasticity for a fresh feeling. The variable thickness of the padding increases comfort and provides alleviation on the pressure points. The gel inserts reduce vibration while cycling. The padding is easy to wash in the washing machine at 30°C and has a long lifespan.

suggested ride duration

MEN GAVIA PADDING

The Gavia padding for men is designed for short and medium distances and approximately a 3 hours span. The padding has a thin density of 65 kg/m³ and a thickness of 3mm. It provides excellent freedom of movement, an incredible elasticity and prevents abrasions due to excessive outer edge. The inner perforated rubber has a density of 65kg/m³ and a thickness of 8 mm. The padding is easy to wash in the washing machine at 30°C and has a long lifespan.

suggested ride duration

MEN GAVIA GEL PADDING

The Gavia Gel padding for men is designed for long distances and approximately a 5 hours span. The padding has a thin density of 65kg/m³ and a thickness of 3mm. The elastic Gavia Gel padding provides excellent freedom of movement and prevents abrasions due to excessive outer edge. The padding is perforated to improve breathability and elasticity for a fresh feeling. The inner perforated rubber, has a density of 120kg/m³ and a thickness of 8mm. The gel inserts reduce vibration while cycling. The padding is easy to wash in the washing machine at 30°C and has a long lifespan.

suggested ride duration

MEN HD ERGONOMIC CARBON PADDING

The HD Ergonomic Carbon padding for men is designed for long distances and approximately a 6 hours span. The padding has a thin density of 65kg/m³ and a thickness of 3mm. The elastic HD Ergonomic Carbon padding provides excellent freedom of movement and prevents abrasions due to an excessive outer edge. The padding is perforated to improve breathability and elasticity for a fresh feeling. The padding is covered with a breathing carbon fibre, which is naturally antibacterial. The inner perforated rubber, has a density of 120kg/m³ and a thickness of 8mm. The gel inserts reduce vibration while cycling. The padding is easy to wash in the washing machine at 30°C and has a long lifespan.

ROGELLI EYEWEAR TECHNOLOGIES

All Rogelli glasses are provided with polycarbonate lenses:

- lightweight
- very clear
- decentred
- scratch resistant
- 100% UV400 protection
- resistant against extreme temperatures.

* Changeable lenses

Easily take the lenses out of the frame and simply click in a pair of alternate lenses. In that way, the glasses are suitable for every weather situation.

** Adjustable temple tips

The hypoallergenic rubber temple tips can be shaped to the face contours. In that way, the glasses are comfortable for everyone.

*** Adjustable nosepiece

The nosepiece can be shaped to the nose contours. In that way, the glasses are comfortable for everyone.

**** TR90

TR90 is a lightweight and flexible fabric. Thereby the glasses are bendable and have a high fracture resistance. TR90 guarantees quality and sustainability.

Clear

ROGELLI EYEWEAR LENSES COLOURS :

Clear
Non tinted glasses for protection against wind, dust, flies and other flying particles.

Yellow

Yellow / Orange

Contrast increasing lenses for sharp vision despite of cloudy and bad weather circumstances.

Orange

Smoke

Smoke lenses decrease sparkling, therefore the view becomes steadier.

Smoke

Revo

Revo is a contrast increasing coating which provides mirror lenses.

AIRBLOC

A High-tech lightweight nylon material developed by Rogelli. This lightweight material feels very soft, wears very comfortable and is windproof.

AIRFLOW

A fabric especially designed for cycling gloves. This functional mesh-structure fabric has excellent breathability and is very elastic, which results in an optimal wearing comfort. Airflow absorbs perspiration quickly and is very suitable for warm weather conditions.

AIRLITE + SOFT TOUCH

Airlite+ Soft Touch is a renewed 100% Polyester fibre developed by Rogelli. The fabric is lightweight, elastic and has an excellent comfort fit. The brushed material provides an extra soft touch and an isolating effect. There's also a summer variant of the Airlite material (without soft touch inside).

ASTERIA

Our new top-of-the-line jersey fabric is incredibly light and soft. The 140gr/mq weight material is made of 86% polyester microfiber and utilizes a compact weave of 40 threads per centimetre. This provides micro-compression and better coverage. This fine knit incorporates 14% elastane for elasticity and has excellent wicking capabilities.

CMX-200

A new innovative material specially developed by Rogelli. This material is a blend of 90% polyester and 10% elastane. Excellent elastic properties ensure optimal comfort. The material feels soft, is lightweight, highly breathable and very elastic. CMX-200 offers an optimum microclimate.

COOLDRY BRUSHED

Cooldry Brushed is a hightech microfiber made of 100% polyester with a light brushed inside, developed by Rogelli. The fabric is breathable and comfortable to wear. The special fibre structure creates an unique microclimate, high insulation and a maximum moisture transport.

COOLDRY SOFT TOUCH

Cooldry Soft Touch is a very light functional hightech fiber made of 100% polyester, developed by Rogelli for an optimal performance. This special and innovative fibre structure creates an unique microclimate. This new Cooldry Soft Touch microfiber has a soft touch feeling and is very light. It's comfortable to wear, provides high insulation and a maximum moisture transport. There's also a summer variant of the Cooldry material (without soft touch inside).

DYNACOOOL

Dynacool is an elastic fabric developed by Rogelli, with the following properties; breathable, multi-elastic, very lightweight, quick dry and comfortable to wear.

DYNACOOOL BRUSHED 260

Dynacool Brushed is an elastic fabric developed by Rogelli, with the following properties; breathable, multi-elastic, very lightweight, quick dry and comfortable to wear. The effect of brushed material is a higher insulation and an extra soft touch on the inside. There are also less heavy variants of Dynacool Brushed: 240, 220 and 200.

DYNATECH SOFT TOUCH

The Rogelli Dynatech System contents of four different functional qualities of garment: R-star, Duostar, Tristar and Penstar.

ENERGY

A smooth summer fabric of 100% polyester, developed by Rogelli. It's lightweight, breathable and quick drying with a very good UV-protection (130gr/mq).

HOLE

A summer fabric designed by Rogelli, made of 90% polyester and 10% elastane. The Hole fabric gets his name due to the small holes in this elastic mesh. Which results in a very good breathability and an excellent wearing comfort. The Hole fabric is quick drying and provides a good UV protection (180gr/mq).

INTEX

Intex is a hightech microfiber made of 100% polyester, and is developed by Rogelli. The fabric is breathable and comfortable to wear. The special fibre structure creates an unique microclimate, high insulation and a maximum moisture transport.

KITE

A super lightweight material made of 100% polyester. The fine mesh structure, small kites shaped, is extremely soft and wears very comfortable. The Kite material provides extra ventilation. It provides good moisture absorption and good bacterial resistance (85g / mq).

MSL

MSL is the collective term for all products in the Rogelli Multisports collection. MSL materials are high performance materials that are very well suited for a wide range of sports. It is very breathable, feels soft, lightweight and has excellent fit and a good moisture absorption.

PERFIT

Perfit is the collective term for all products in the collection of Fitness Rogelli. Perfit materials are high performance materials that are very suitable for the gym. It is a very breathable fabric, feels soft, lightweight and has excellent fit and a good moisture absorption.

PERFORMER

A cool, lightweight and elastic fabric that provides a compression effect which supports your muscles and blood circulation. Performer material has durable stretch characteristics for a long lifespan and excellent moisture absorption.

RIGHETTA+

A mid-season square-shaped fabric of 100% polyester developed by Rogelli. It's breathable and quick drying with a very good UV protection. The effect of a fleece inner liner is a higher insulation and an extra soft touch on the inside (185gr/mq).

RMX-100

A new innovative fabric specially developed by Rogelli. This material is a blend of 92% polyester and 8% elastane, making the fabric comfortable to wear. The material feels soft, is lightweight, breathable and elastic. The unique honeycomb structure provides a very rapid moisture transport, which creates an optimum microclimate.

SANDED

A mid-season smooth fabric of 100% polyester developed by Rogelli. It's breathable and quick drying with a very good UV protection. The effect of a fleece inner liner is a higher insulation and an extra soft touch on the inside (160gr/mq).

SENSOR

An oval-shaped summer fabric of 100% polyester, developed by Rogelli. It's lightweight, breathable and quick drying with a very good UV-protection (125gr/mq).

SENSOR+

An oval-shaped midseason fabric of 100% polyester developed by Rogelli. It's breathable and quick drying with a very good UV protection. The effect of a fleece inner liner is a higher insulation and an extra soft touch on the inside (185gr/mq).

SHERWOOD

A very results-oriented material. Lightweight, cool and elastic fabric with a highly technical structure. This structure supports the blood circulation and muscles by its extra compression.

TIME-OUT

Known as one of the lightest 100% polyester fabrics. It's very breathable and is quick drying. This fabric is used by professionals. With excellent UV protection, moisture absorption and bacterial resistance (110gr/mq).
