The Cap known to over 5,000,000 users

CEANDESS PATENT FILLER CAP

- PERFECTLY DESIGNED
- QUICK ACTION . . .
- POSITIVE LOCKING NOT DEPENDENT ON SPRINGS
- DOUBLE ANTI SPLASH
- FINEST MATERIALS
- FIRST CLASS WORKMANSHIP
- EXTREMELY LONG LIFE
- HANDSOME APPEARANCE

THESE, AND PERHAPS MANY OTHER REASONS EXPLAIN THE OVERWHELMING POPULARITY OF THE "CEANDESS PATENT" FILLER CAP

at Your Service

THE CEANDESS PATENT FILLER CAP HAS THE FOLLOWING ADVANTAGES

QUICK LOCKING

Quarter turn does it.

POSITIVE LOCKING .

By mechanical means—NOT dependent on springs.

SAFETY CATCH

Impossible to remove cap without depressing. If cap should jar loose under exceptional road conditions it will be held by the safety catch.

LIQUID TIGHTNESS .

Under all conditions.

AN ANTI-SPLASH

That really does what it is supposed to do. The patented Anti-Capillary action valve further increases the efficiency of the anti-splash and prevents leakage through the vent holes.

PETROL AND OIL . RESISTING WASHER .

Is easily replaced but is seldom necessary as due to the unique construction of this cap there is no abrasive action on the washer during fixing and removing the cap.

INSTRUCTIONS FOR USE

TO FIX . .

Slide Cap over base, press down and turn Right.

TO REMOVE

Turn Left, keeping a pressure on Cap till stop is reached, then lift.

We make Filler Caps for all types of Vehicles and Stationary Engine requirements and can offer many types of Bases to suit customers own design.

MAY WE DISCUSS YOUR PROBLEMS WITH YOU
