THE LIST

Knowledge is our secret ingredient.

Winter  2020

Behind A *50 year* Legacy

Karl E. Rader and his wife Dagmar R. Rader founded RADER FOODS INC., in 1970. Both were born and raised in Vienna, Austria.

Karl, knowing the reputation of Switzerland for high standards in the culinary and hospitality field, started his career there and then moved on to Holland America Cruise Line as a Sous Chef.

After the couple married, they relocated to the USA. Karl worked as a Sous Chef at the Carlyle, a 5 Star hotel in Manhattan. Following that and a move to Miami he was the Sous chef at Doral on the Ocean Hotel, another 5 star property.

His vision to introduce culinary excellence to south Florida created the RADER brand. It all started in a small apartment on a dining room table and has grown to spacious offices and a refrigerated warehouse.

Now, 50 years later, Dagmar R. Rader and Rachel A. Stampfl, continue Karl's dream with caring, family oriented leadership committed to serving the industry with the finest products and the very best service.

Macaron Recipe

Directions of use :

Recipe for 180 to 200 shells

INGREDIENTS

Patis'Macaron Extra :	1000 g
Hot water > 45°C :	200 g

(We suggest hydrosoluble powder coloring, in case of liquid coloring, subtract this quantity from the water quantity)

Beat with a flat beater at high speed for 4 min. Poach immediately on a **double baking tray** + greaseproof paper or Silpat (recommended). Bake in a deck oven at 150°C, open dampers for 22 min. Or bake with a convection oven at 135°C – 22 min, open dampers.

Bake in an oven without humidity.

COOKING TIPS :

- For perfectly successful macarons, be careful about temperature and cooking time.
- To obtain beautiful smooth and round shells, do not bake your macaroons in a damp oven. If the oven is wet, leave it open, empty, for 30 minutes.
- Do not hesitate to plan one or two adaptation firings according to the specificities of your oven.

HOW CAN YOU COLOUR YOUR MACARON SHELLS ?

We suggest hydrosoluble powder coloring in that case you need to dilute the coloring in water.

If you prefer to use liquid coloring you need to subtract this quantity from the water amount.

COLORING TIPS :

For chocolate colored shells: avoid cocoa powdered.

It is preferable to color the macaroon shells with a brown hydrosoluble powder coloring. Cocoa powder does not allow a good development of the shell of the macaroon.
