SPEC-CAST ENGINEERING  
*Trusted to deliver*

# Bulk Materials Handling Products

## Bucket Elevators

**Steel Buckets**  
Suitable for elevating sharp, bulk density materials

**HDPE Buckets**  
Suitable for handling large volumes of all types of grains, feed and most food products

**Nylon Buckets**  
Suitable for high impact & abrasion resistance. Better heat resistance and handling hot, abrasive and sticky materials

## HDPE & UHMWPE Sheets

Ultra-High-Molecular-Weight-Polyethylene (UHMWPE) is thermoplastic engineering material, and its molecular weight can reach 4.5 to 9 million. It combines many characteristics such as abrasion-resistance, impact resistance/absorption, chemical corrosion resistance, low temperature resistance and self-lubrication etc.

Available in Black or White

**HDPE SHEET:** 2000 x 1000 x 10-60mm  
**UHMWPE SHEET:** 3080 x 1220 x 10-60mm

# PARAMOUNT EQUIPMENT

We are level 1 B-BBEE company with a National Footprint and SADC reach

**We are a diversified company with extended offerings in the Manufacture and Supply of Machines for the mining and related industry.**

We have been trading since 2013. We offer Professional Engineering Services to industry. We strive for innovation and utilize the best material available in the market and offer the best fit solutions for our customers. Understanding our customer requirements is important. We source and provide them with best engineering solutions that are suitable for their operations. Paramount has recently partnered with the manufacturer, Revathi Equipment Limited (REL), an India based company to service the African continent. Paramount Equipment is the Authorized REL Dealer and Distributor

## INTRODUCING:

**AUTONOMOUS  
MINING THE  
WAY FORWARD**

REL (India) designs and builds a varied range of blast hole drills for the mining and construction industry, incepted in the year 1977 as Revathi CP Equipment limited the Indian Unit of Chicago Pneumatics USA. Since its inception REL has manufactured more than 2000 drills of different capacities, delivering quality holes drilled safely and accurately at the lowest cost.

Our commitment to continuous improvement and innovation drives our ongoing and growing African presence. Please feel free to contact us for more information about our industry-leading products and services.

**Paramount Tracks** is a diversified trading company that provides professional engineering services to the mining, plant and construction industries. We are a 100% black owned company and have presence in Johannesburg, Middelburg, Limpopo, Northern Cape and Botswana. We offer specialised services pertaining to the supply of all types of earthmoving undercarriage, GET, along with offering a repair solution for all bucket repairs, bowels, blade repairs, track frames etc.

We have the infrastructure to service large mining and construction companies. We supply a vast range of undercarriage that is suitable for all types of drill rigs and crawler equipment, along with wear parts that are suitable for most GET applications. We own a Track Workshop and Engineering Facility in Middelburg, Mpumalanga region & have developed strong relationships with the European undercarriage manufacturer ITM which is located in Italy. We currently service high end corporate clients in South Africa and have been appointed as the official ITM distributor for South Africa and Botswana through our Paramount Tracks Botswana entity. Paramount Tracks has been recognised as the official dealer of the Combi Wear Parts Ground Engaging Tools Range for South Africa who specialises in the manufacturing of this Swedish wear parts range and aims to offer our customers a premium product. We are the appointed Hardox Wearparts Centre in Middelburg, who is a member of SSAB and offer the following services:

- Cutting • Welding • Machining • Bending • Post-treatment • Perforation etc.

We aim to provide high productivity, along with low maintenance costs which is the core business for a Hardox Wearparts Centre.

## THE OEM ALTERNATIVE

### Our Vision

To be a regionally recognised professional engineering and technical services company dedicated to providing value added services to customers, from an engineering and supply of new undercarriage components perspective.. Paramount Tracks values are built on dedication, quality workmanship and excellent customer services that are based on sound engineering principles along with maintaining a safe and healthy working environment.

### Our Mission

We undertake to uphold the following principles:  
Quality parts and services  
Develop and empower the community we operate within  
To work to the highest quality standards possible  
Shrive for continuous improvement

# QUALITY EARTHMOVING EQUIPMENT SPARE PARTS FOR ALL LEADING BRANDS OF MACHINERY

Construction workers and road development crews will certainly tell you that earthmoving equipment is a necessity in their field. The vehicles within this range are modelled closely on trucks and tractors, and make it possible to excavate and move earth on a large scale, quickly and efficiently. It is important to make sure that the supplier that you purchase your machinery from also stocks earthmoving equipment spare parts, to ensure that repairs and maintenance along the way are simple to handle. While there are many items of machinery within this range, there are four main types of equipment commonly used for earthmoving tasks and projects, as follows:

**Backhoe loaders** – these compact units have a bucket-shaped shovel on the front and a smaller bucket on the back for digging. They are compact and therefore ideal for use in urban construction areas where space may be limited.

**Excavators** – these are heavy duty vehicles that move on tank treads. The one long bucket arm is used for digging substantial amounts of dirt and can also be used for heavy lifting.

**Bulldozers** – these units also move on tank treads and are considered to be heavy duty. In the front of the bulldozer is a wide, flat blade which is used for pushing dirt or grading land. The unit can gather and move dirt, boulders and rock piles.

**Dump trucks** – these units are used to transport large amounts of gravel, earth and other materials to construction sites. They have a hydraulically operated bed that tips the contents of the bin out when required.

If you are looking for earthmoving equipment spare parts to ensure that you can always operate your equipment safely and effectively, contact us at Tractor & Grader Supplies. We will ensure that you are provided with access to an extensive range that offers exceptional value for money and durability.

# NEVER LOSING FOCUS

When you hear the name **LNE Agri Earth**, do you think of TLB's? Perhaps you associate them with the Carraro™ brand, or maybe it is their "old-fashion" values and service?

Whichever it is, this company cannot be defined with only one word. This small but powerful company made Carraro™ a familiar name in the South African market, creating awareness of the many OEM brands that trusts Carraro™ and uses their complete components in their machines. Some even rebranding the components with their own name as part of their contract with Carraro™.

Why?

Profit. With their brand, they can sell it as their own, without any competition. But now it all changed.

The owners and players in this industry are now educated. They know that they can buy the exact original part or complete component at a fraction of the price.

Many Copy Cats are out there in the industry flashing the Carraro™ brand - be careful. We are the only **dedicated Carraro dealer** in South Africa. It is easy to cut/copy and paste a logo onto every surface you have available.

**Heed this as a warning** - this is a direct reflection of the integrity of the supplier you are doing business with. These "Carraro" parts are not original.

"There is nothing wrong with selling replacement parts, but do not hide the fact. Be upfront with your customer and give them a choice – original vs replacement."

"LNE Agri Earth sells replacement engine parts that carry a 3-month warranty. These parts have created their own reputation; that is why word-of-mouth remains our most powerful marketing tool", says founder Alani van den Bergh.

**"We've built our brand based on integrity and honesty..."**

"Our parts sell themselves. Our team is there to support and assist the customer. We will never lose our focus on the most important element of our business, **the customer**, no matter how big we get."

"We've built our brand based on integrity and honesty, and although it is not the easy way, it is worth it."

# CATERPILLAR & KOMATSU DOZER & EXCAVATOR TRACK FRAMES

## SERVICE EXCHANGE

Our Service Exchange Program provides you with a high-quality track frame rebuild solution. All PEX units are like-new, quality track frames that is on hand for delivery to keep your machine productive and keep your costs minimal.

Spec-Cast’s PEX units gives you the advantage of an immediate trade-out of critical components that allows your machine to get back to work as quickly as possible.

## TRACK FRAME REPAIRS

Spec-Cast offers partial repairs and full track frame rebuilds, using only quality approved parts including some OEM components that is critical to the longevity of the frame. Strict adherence to our QCP [Quality Control Procedures] provides peace of mind and builds trust in the Spec-Cast Brand. Spec-Cast’s Track Frame Repairs covers a wide range of crawler machines types such as dozers, excavators and shovels across multiple manufacturers and applications.

## TRACK FRAME COMPONENTS

Caterpillar and Komatsu Dozer aftermarket track frame components of the highest quality and standard are stocked for immediate supply.

- Bogie Pins and Bogie Pads
- Roller and Idler Caps
- Track Guides
- Equalizer Bars and repair components
- Trunnion’s and repair components
- Bushings and Seals
- Minor Bogies

## GROUNDING IN SUCCESS AND GEARED FOR THE FUTURE

Over the last 18 years, customers of Kemach Equipment (Kemach) have become accustomed to being supplied with world-class equipment, outstanding customer service and competitive pricing that compliment every buying decision. These are the underlying pillars of the best business decision model that Kemach aspires to and which is the key to their continued success.

The ever-changing needs of Kemach customers are strongly aligned with the challenges that mining, materials and construction industries alike are facing. With the evolution and transformation of project scopes, the introduction of strong, high-performance products and cost-centric services are needed now more than ever. By staying ahead of the demand and adapting to the curve, Kemach has re-aligned its business to current needs and are responding to the fast-paced requirements of customers. Les Lothian, CEO of Kemach Equipment says, “We remain a trusted and experience management-led company with a steadfast focus on following strategic goals determined by local needs and global events. We continually look at ways to expand our offering and ultimately give our customers what they truly need.” In the coming months, Kemach will continue to expand its offerings to its customers and to build on being a reliable partner. Les Lothian further adds, ‘The immediate focus for Kemach is on growth within, and for, South Africa. We are confident that we’ve established ourselves as a trusted partner across the region and Kemach is encouraged by the positive upturn in developments that we are seeing in the construction, earthmoving and materials handling sectors.’

By offering customers leading brands such as Kemach Forklifts, Kemach Lubricants and McCloskey and by working with OEM principals in providing much needed market feedback, Kemach Equipment continues to be a company that appeals to various industries as a best business decision – today and into the future.

## Unbottling minerals processing plants

It is not uncommon to find multimillion Rand processing plants with enormous production potential being severely restricted by poorly specified or old-fashioned screening media. Provided that the plant is fully operational and is appropriate for the job, the screen is the usual culprit that slows production or leads to unacceptably high levels of downtime. Fortunately, with the right expertise and best products for the job, help is at hand for these ailing operations. Mineral's processing equipment supplier, ELB Equipment, in partnership with internationally acclaimed screen media manufacturer, Major Wire, have spent several years fixing screening problems at an almost endless array of processing plants. Wayne Martin, technical sales representative of ELB Equipment, says the company's partnership with the world's leading supplier of screen media, enables the company's technical teams to identify the source of a screening problem and provide solutions to bring the equipment back up to the required spec and further improve on its performance through the use of a wide range of Major Wire screen solutions for practically any application.

**A variety of Major Wire grids**

### Success stories

Examples of the type of improvements obtained with Major Wire screens in the mine and quarrying industry are many including a recent instance where imported anthracite was difficult to process due to its "sticky, wet" consistency and was grinding production to a snail's pace. The introduction of a carefully selected Major Wire tensioned screen immediately boosted production by 50% with a host of other benefits to boot. More recently a simple upgrade of its traditional panel-type mesh screens, to Major Wire's Flex-Mat screens, allowed a major diamond producer to reduce carry over by more than 15%. Similarly, one of the country's largest cement producers was able to improve the production feed rate of highly abrasive dolomite to 360 tons per hour (TPH) from its previous 180 TPH. Simultaneously, carry over was reduced from 35% to zero and the panels wear-life was improved from having a seven-week lifespan with traditional woven mesh, to more than 11-months with the Flex Mat solution. The enormous wear-life capabilities eventually led to a further reduction of wire diameter for even more open area while maintaining a lifespan of more than six months. It also reduced up to one hour of maintenance per shift.

Another recent success story worth mentioning is of a metal recovery plant that was experiencing severe pegging and blinding issues where the screen needed to be cleaned manually by pick and hammer welding workers for at least two hours per day. A simple upgrade to a Major Wire tensioned screen solved the problem and no cleaning has been required thereafter. A similar case reduced a major coal mine's screening costs from 63c per ton using woven wire screens to just 23c using Major Wire Flex-Mats.

### Percentage improvements

"This is a game of percentages and even the smallest improvements can have a significant effect on a company's bottom line. Savings as a result of reducing downtime, production volume increases and the move towards improved overall productivity can usually be measured in millions of Rands and tons. "With the right products and expertise to boot, local distributor ELB Equipment has an entirely dedicated screening division dealing with mines and quarries to improve overall processes. Holistically it is not just about saving capacity on site, but rather problem-solving overall screening efficiency, cost of ownership etc. We also provide training on site in order to get the whole team up to scratch when it comes to operation and maintenance of our screens.

"What's more customers can ask for a full vibration analysis on their existing screens to ascertain the speed, stroke and g-force of the equipment and measure its effectiveness before undertaking any upgrades so that the right screens can be fitted accordingly," says Major Wire business development manager, John Pelser.

### Well supported

In terms of service and support ELB Equipment has a vast branch and dealer network throughout southern Africa with well trained and dedicated staff to service customers screening requirements. Sufficient stock holding make for quick parts turnaround and where necessary stock can be held at branch level anywhere in the sub-region. A good example of this is our maximum 4 weeks lead time for first time delivery to new customers and a one-to-three-day lead time for existing customers. Major Wire screening media fits on all standard screens including ELB Equipment's Powerscreen and other screening equipment. It is a quality leader and the benchmark for other manufacturers in terms of performance, durability, and reliability. The screens mostly high manganese and carbon content in the wire which enables it to give the best wear-life and performance possible. Polyurethane strips also protect the support bars and make for more active media on screen. Because of the efficiency of the screen and better wear resistance, the wire can usually go to thinner gauges and create more open area.

"Where necessary the screens can also be manufactured in 304 and 316 stainless steel as an option in fine, wet or sticky applications. These are not coated stainless as provided by some manufacturers, but rather made entirely of stainless steel to prevent corrosion and abrasion. Major Wire is also working on longer life screens specifically in heavy loads and high-capacity applications where wire can take the place of modular rubber or PU screens for much better throughput. Read more here: <https://majorflexmat.com/en/news-room>

### Working together

"Thanks to our partnership with Major Wire we are able to provide comprehensive product and service offerings for all our customers' requirements. As with all the brands and equipment provided by ELB Equipment, Major Wire is the best-of-breed manufacturer of screening media in the world. Thanks to our large footprint throughout the sub-region, we are able provide screening solutions for all requirements. "We also work with the customer to find workable solutions. It is easy to go sell a mesh, but for us it is about overall assessment of the operation, getting the machines back to standard and making it more profitable for the customer. Our team prefers to prove that we can provide the services and products to support our customer's production requirements," concludes Wayne.

**ELB Equipment, Wakefield Harding, Tel: (011) 306 0700, Email: [wakefieldh@elbquip.co.za](mailto:wakefieldh@elbquip.co.za), Web: [www.elbequipment.com](http://www.elbequipment.com)**

## HPE Africa launches new Hyundai R210 SMART PLUS crawler excavators

New to HPE Africa's range of Hyundai crawler excavators, is the recently launched Hyundai R210 SMART PLUS series, with advanced design features over the previous 210 SMART machines.

"The Hyundai design team is committed to ensuring construction equipment meets exact requirements in all operating conditions and this is evident in the regular launch of versatile machines, with advanced technologies for improved performance and precise control in diverse industries, including arduous environments," explains Ross Collard, Managing Director, HPE Africa. "Noteworthy features of the R210 SMART PLUS series compromise fuel efficiency, high productivity, safe and smooth operation and easy control.

"With the addition of the new Eco mode, users now have a wider choice of operating modes to suit specific tasks and to further improve fuel efficiency. Other features that contribute to lower fuel consumption include the breaker mode that automatically sets the pump flow to an optimal level and a fuel saving kit for accurate monitoring. The auto deceleration system prevents fuel losses by reducing engine rpm during no-load conditions. The electro-hydraulic control system ensures precise flow at various workloads for optimum productivity and the open centre design of the Main Control Valve (MCV) provides fast response and maximum efficiency.

"Hyundai's advanced computer aided power optimisation CAPO technology and hydraulic flow summation contribute to faster cycle times, for greater output and improved performance. The arm regeneration system, which has been designed for smooth operation and to prevent cavitation, also improve fuel efficiency and performance. This machine boasts excellent bucket digging force (bucket 15 500 kgf / SAE kN 133.4) and arm crowd force (12 000 kgf / SAE kN 112.8.) R210 SMART Plus excavators, with a dual travel option, offer a high traction force (21 100 kgf) and easy manoeuvrability."

The water cooled, 4 cycle, 6 cylinder in line, direct injection turbocharged engine is manufactured for optimum performance in challenging conditions, including hot, humid and dusty environments.

For increased machine durability, this series has a reinforced front structure, with specialised steel plates, a strengthened undercarriage, as well as a forged ring body. In addition, the X frame provides excellent resistance to torsional bending, extending service life of the structure. Additional reinforcement of the bucket link supports enable greater bucket dig and arm crowd forces and enhanced reinforcement of the idler frame ensuring dependable operation in tough operating conditions. These machines, with a large capacity fluid tank, have been designed for easy access to components for simplified maintenance procedures. Useful components include an air pre-cleaner that removes dirt and debris from the air before it enters the air filter and dust, waterproof electrical connectors and an anti-restart function that protects the starter from damage during engine operation. A counterbalance valve works as a hydrostatic brake and prevents accidental rolldown of the machine in steel gradients and a boom and arm holding system stops attachments from drifting against gravity due to prolonged overhanging. These machines are also fitted with an auto engine overheat and warm up function, a battery disconnect switch, a lower belly guard and a tank safety cover.

For improved safety and greater comfort on site, these machines have user-friendly functionality, a larger cab with 360 degree visibility, adjustable seats and additional lamps and mirrors. A user-friendly instrument panel makes it easy to control critical systems, like hydraulic oil and coolant temperature, fuel levels, self-diagnostic checks and maintenance management.

**For further information contact Ross Collard Managing Director- HPE Africa, Capital Equipment Group (CEG), Invicta Holdings Limited | Email: [Ross.Collard@hpeafrica.co.za](mailto:Ross.Collard@hpeafrica.co.za) | Telephone: (011) 397 4670 | Web: [www.hpeafrica.com](http://www.hpeafrica.com)**

Strata's comprehensive maintenance plan is yet another preventative system in place to ensure their machines are kept in great working condition.

## Strata does safety right

Safety compliance within companies is of the utmost importance to prevent incidents, particularly in the mining industry, where people are exposed to harsh working environments. At Strata Mining Services, management is committed to ensuring SHEQ standards are upheld through various campaigns. Every two weeks, management teams make themselves available and interact with the workforce on site by conducting Visible Felt Leadership (VFL).

"We use this tool to check if there is safety compliance. It's not a militant exercise, but rather one that allows management to socialise with the workforce and explain procedures if needed," explained Stoffel van Deventer, Compliance Manager. "It makes a huge impact and reinforces our culture of safety, especially when our employees understand procedures and why they're important."

Some of the other initiatives that Strata use to maintain their safety culture include holding weekly Health and Safety meetings and running campaigns that report near misses. These campaigns highlight the need to stay alert and encourage staff to report potential hazards. As an added incentive, the employees who regularly report near misses are awarded shopping vouchers at the end of the month.

"This campaign enables us to learn from each other's mistakes. If something happens once, we investigate the near miss, put protocols in place to prevent it recurring and then we share this best practice within the group," Stoffel said.

More recently, a new Traffic Management Plan has been implemented at their Northern Cape premises which saw the installation of fisheye mirrors at blind corners and stop signs at possible collision points. One of the safety representatives at the Northern Cape site, Nollie Sobudula, expressed that she was proud of her job as it's a significant responsibility to look after people's lives.

"I started as a cleaner in the workshop, but now I take care of everyone's safety and make sure they follow the correct safety protocols. After I became a safety representative, I was worried people might not take me seriously, but they do. When I call out unsafe behaviour, they listen and things start to change," Nollie said.

Strata's comprehensive maintenance plan is yet another preventative system in place to ensure their machines are in great working condition and that operators are kept out of harm's way.

"Our people and our equipment are our greatest assets," Stoffel said. "We have a commitment to make sure people get home safely at the end of each day, and this ensures that business keeps moving forward."

**BLT WORLD's** trommels and apron feeders are used to remove the small fraction - fines - from a waste stream, to make the remaining material easier to handle for the operatives or processing equipment. Trommels are used in the classification of solid waste, treatment of wastewater and recovery of valuable minerals from raw materials. They are also used in the screening process of composts and in food industries, trommel screens sort dry foods of different sizes and shapes.

## MDS TROMMELS AND APRON FEEDERS IMPROVE EFFICIENCIES DURING MATERIALS HANDLING IN MINING

**BLT WORLD's** MDS static and mobile trommels and apron feeders, - which are able to screen rocks as large as 1,5 m - have been designed for compatibility with other surface equipment in the mining sector, including crushers, feeders, recycling plants and other trommels, to provide maximum productivity and minimise downtime.

"These trommels have been well received by the global mining sector because they have been designed with the versatility to handle more than one task – a critical factor in the selection of capital equipment," says Ken Mouritzen, managing director, BLT WORLD. "MDS trommels are manufactured with large size drums and can accommodate up to three different screen sizes, to facilitate the separation of rocks into four different sizes. These customised systems have important features for high efficiency, including remote controlled use, modular drums, drum cleaners and electronic systems to accurately monitor and control operation.

"MDS trommels provide an advantage in screening, as they can efficiently handle large rocks and are also effective in cleaning clay bound rock and rocks mixed with limestone and other tricky materials, in preparation for crushing. MDS machines are also used to clean overburden and blasted rocks and are perfect for producing rip rap material in quarries.

"Where many conventional machines fail in wet, harsh mining conditions, these trommels which are fitted with drum cleaners, are designed to clean rocks and prevent sticky material jams, in all weather conditions, preventing downtime and ensuring optimum productivity. MDS trommels, which are manufactured from high tensile steel, are also suitable for processing abrasive materials like granite.

"Our customers in the mining sector, have shown a particular interest in MDS M515 all-terrain track trommels, which handle rocks up to 800 mm in size and efficiently separate difficult and sticky materials, like mud and clay. This robust series, with a 30 T hopper capacity, is able to produce three products concurrently, at an output of over 400 Tons per hour."

MDS M515 3 split mobile track trommels have an advanced cleaning mechanism that keeps the drum apertures unblocked. These machines are supplied with fold-out stockpiling conveyors and are able to move around a mine and from one site to another. Technical features include a fines conveyor, an oversize conveyor (maximum rock size of 800 mm) and a mid-product conveyor (maximum rock size of 460 mm). In addition, these machines, which are powered by a diesel engine, have a heavy-duty drum with interchangeable screens and a hydraulic push feeder. Other surface equipment in BLT WORLD's MDS range include M615 static trommels that are designed for removing soils and fines from rip rap or blasted rock. These machines have an output capacity between 350 and 500 Tons per hour. The M820 unit is a large, heavy duty rock trommel, capable of screening rock up to 1 m in size, at approximately 750 Tons per hour. This modular machine is available with three or four splits and is suitable for cleaning dirty rock or for screening blasted material. The static M825 machine, which handles rocks up to 1,5 m in size, is perfect as a primary screener for material direct from a blast. The hopper, with 100 Ton capacity, can be loaded by dump trucks, with an output of 1 250 T per hour. These units are also available with hydraulic rock breakers. Also in the MDS range are trommels designed for light recycling materials, including compost and wood bark.

MDS trommels can be designed and manufactured to exact specifications and vary in terms of dimensions of the trommel width, diameter and aperture of holes. The size of fines removed by the trommel screen is predetermined by the holes in the trommel drum and varies depending on the operation, waste stream, volume of material and product specifications. BLT WORLD's MDS apron feeders, with electric or hydraulic drives, are available as standard units for quarries, aggregates or recycling applications and as heavy-duty machines for mining, ore and coal environments. MDS trommel screens and apron feeders, which are also available from BLT WORLD on a fully serviced rental basis, are supported by a technical advisory, supply and repair service throughout Africa.

# earthbroker

**your sourcing solution for new & used equipment & machinery**

The Earthbroker is published monthly and 5400 copies are sent to all the mines, quarries, and all companies dealing with earthmoving and construction in South Africa, Africa and some overseas countries.

We are **ABC accredited** and have our **Pamms certificate No: 2A8DD9F60574FFC2A4EEEE01A**.

We also have a website where anyone can view the magazine, which is updated monthly with the latest changes and advertisements. Please view our E-Mag on [www.earthbroker.co.za](http://www.earthbroker.co.za)

Our E-magazine is uploaded monthly to Facebook, Instagram, LinkedIn and our mobile App.

We accept about 5 editorials a month which we insert free of charge. Should you have an editorial which is relevant to the industry, we will gladly give it consideration.

For details of our prices on a full page, half page or quarter page, please phone me on 083 456 4027 or e-mail me at [janine@earthbroker.co.za](mailto:janine@earthbroker.co.za).

We do not ask anyone to sign a contract, however we do insist on a **full calendar month's notice** for cancellation.

Please note that all quotations exclude VAT. We do insertions, (own printing costs) at R1.50 each excluding VAT.

Classifieds at R500.00 excluding VAT for a business card size advertisement only.

**Janine Sargeant**  
(CELL)083 456 4027  
[janine@earthbroker.co.za](mailto:janine@earthbroker.co.za)

please email your details to [janine@earthbroker.co.za](mailto:janine@earthbroker.co.za)**

## Conditions of Acceptance for advertising

### Adverts are subject to the following conditions:

1. Often we receive faxes with illegible letters or numbers. We accept no responsibility due to this.
2. We accept NO responsibility for errors in advertisements received telephonically.
3. We reserve the right to refuse placement or to place the advertisement/s as we see fit.
4. No responsibility will be taken for omission of advertisements, for any errors/colour-differences in advertisements or any results due to such errors.
5. We accept no responsibility for the quality of goods advertised. We merely bring buyers and sellers into contact with each other and we are not responsible for any results due to transactions made through the advertisements.
6. Please note one full calendar months written notice for cancellations.
7. Payment due prior to publication or interest will be charged.
8. There will be an annual increase of 10% at the beginning of each year.
9. The Earthbroker will not be held responsible for content of any advert inserted in our magazine.

**“The man who stops advertising  
to save money is like the man  
who stops the clock to save time.”**

**- Thomas Jefferson -**

In difficult economic times one should put more effort into promoting  
your business, your services and your products.

Cutting back on your advertising will ensure that your business loses ground  
to competitors who know and understand this.

Condition Monitoring Specialists

Analysis by

# AVOID DOWNTIME

**Minimise the  
risk with  
Bell LubeCheck  
A predictive  
maintenance  
tool that  
analyses oil to  
save you time  
and money.**

## BENEFITS

- Identify what preventative maintenance is needed
- Detect abnormal wear
- Detect oil degradation
- Detect oil/component contamination
- Detect impending failures
- Verify the oil in use
- Optimise service intervals
- Avoid unnecessary overhauls
- Avoid loss of production
