DONE BY QUALIFIED TECHNICIANS WITH STATE OF THE ART BOSCH EQUIPMENT

WE ARE AUTHORISED AGENTS FOR (ALLISON TRANSMISSION, TELMA RETARDERS,
BOSCH FUEL INJECTION, KIRLOSKAR DIESEL ENGINES).
WE SERVICE THE BRANDS OF:

SPEC-CAST ENGINEERING
Trusted to deliver

Bulk Materials Handling Products

Bucket Elevators

Steel Buckets
Suitable for elevating sharp, bulk density materials

HDPE Buckets
Suitable for handling large volumes of all types of grains, feed and most food products

Nylon Buckets
Suitable for high impact & abrasion resistance. Better heat resistance and handling hot, abrasive and sticky materials

HDPE & UHMWPE Sheets

Ultra-High-Molecular-Weight-Polyethylene (UHMWPE) is thermoplastic engineering material, and its molecular weight can reach 4.5 to 9 million. It combines many characteristics such as abrasion-resistance, impact resistance/absorption, chemical corrosion resistance, low temperature resistance and self-lubrication etc.

Available in Black or White

HDPE SHEET: 2000 x 1000 x 10-60mm
UHMWPE SHEET: 3080 x 1220 x 10-60mm

THE PARAMOUNT GROUP

Tracks & Equipment

We are level 1 B-BBEE company with a National Footprint and SADC reach

We offer extended engineering solutions in the Manufacture, Fabrication, Refurbishment of Buckets, Bowls and Supply of Undercarriage and GET in the mining and related industries.

Paramount has been trading since 2013. We offer Professional Engineering services to the mining industry. We strive for innovation and utilize the best material available in the market and offer best fit solutions for our customers. Understanding our customer requirements is important. We source and provide them with best engineering solutions that are suitable for their operations.

Paramount has aligned with only the best manufactures within this industry, Combi wear parts (GET), ITM (Undercarriage), SSAB on their Hardox and XMOR range. With these partnerships we are able to service large mining companies from a manufacturing and refurbishment perspective.

Our commitment to continuous improvement and innovation drives our ongoing and growing African presence. Please feel free to contact us for more information about Our industry-leading products and services.

AT TGS WE HAVE
A WIDE RANGE
BEARINGS &
CRANKSHAFTS
AVAILABLE IN
STOCK

CRANKSHAFTS

TGS Crankshafts are made out of forged steel, for strength and durability. The forging process allows for the continuity of material grain flow which assists in the transmission of stresses for maximum strength and reliability. All crankshafts are balanced to perfection, both statically and dynamically to provide a smooth and vibration free operation.

BEARINGS

Main & rod bearings come in standard, undersized, and oversized. An undersized bearing has extra material thickness on the inside of the bearing facing the crankshaft journal. Undersized bearings are used when a crankshaft has been machined or ground undersize. Oversize bearings have more material on the outside facing the bearing housing bore. Oversized bearings are used when the block has been machined or line bored oversized. TGS offers many of these specialty bearings for many popular applications.

TGS – YOUR FIRST CHOICE SUPPLIER

TGS™ supplies OPM (Original Parts Manufacturers) Parts for your Earthmoving and Mining Machinery. We not only offer you premium parts but also an exceptional service, outstanding savings and the support you need to get your parts quickly and accurately.

TGS also offers complete Cylinder Heads fully built, ready to install. The heads are assembled using blueprinting methods; where all the parts and components are check for fitment prior to assembly. All our cylinder heads are checked for dimensional accuracy, straightness and surface finish. The valve seats are micro finished and the assembled cylinder heads are vacuum leak tested to assure a positive valve to seat seal.

TGS CYLINDER HEADS

Our cylinder heads are CNC machined to exact specifications using premium materials and state-of-the-art manufacturing to ensure the quality of every casting.

TGS Cylinder Heads are available as budget-friendly bare Cylinder Heads for repairs, where re-usable parts are swapped over from the original cylinder head. We offer a complete inventory of new replacement valvetrain parts to complete the job.

All our cylinder heads are checked for dimensional accuracy

SERVICE EXCHANGE

Our Service Exchange Program provides you with a high-quality track frame rebuild solution. All PEX units are like-new, quality track frames that is on hand for delivery to keep your machine productive and keep your costs minimal.

Spec-Cast's PEX units gives you the advantage of an immediate trade-out of critical components that allows your machine to get back to work as quickly as possible.

TRACK FRAME REPAIRS

Spec-Cast offers partial repairs and full track frame rebuilds, using only quality approved parts including some OEM components that is critical to the longevity of the frame. Strict adherence to our QCP [Quality Control Procedures] provides peace of mind and builds trust in the Spec-Cast Brand. Spec-Cast's Track Frame Repairs covers a wide range of crawler machines types such as dozers, excavators and shovels across multiple manufacturers and applications.

TRACK FRAME COMPONENTS

Caterpillar and Komatsu Dozer aftermarket track frame components of the highest quality and standard are stocked for immediate supply.

- Bogie Pins and Bogie Pads
- Roller and Idler Caps
- Track Guides
- Equalizer Bars and repair components
- Trunnion's and repair components
- Bushings and Seals
- Minor Bogies

UNITS THAT WE ALSO DO:

- Bell grader transmissions
- Cat transmissions
- Funk transmissions
- Terex & Euclid Differential center portions
- Bell differential center portion
- Chelsea PTO'S
- Terex engine PTO'S TR100

**Repairs to all
OFF & ON Highway
Transmissions,
Torque Convertors,
Gearboxes, Differentials
& Power Take Off's**

Vortex Transmissions sell genuine Allison parts for all our transmissions
 Dvno testing is done in house and all transmissions that are tested have test reports.

BABCOCK TO BRING BOILER UNITS INTO THE 2020S AND MEET NEW EMISSION REGULATIONS

Babcock has come full circle at a major power station where it will be upgrading electrostatic precipitators (ESPs) on six boiler units that Babcock designed and built in the 1980s.

Using technology not available at the time, Babcock will bring the boiler units into the 2020s, enabling the power station to comply with latest emission regulations of below 50mg of dust per normal cubic metre (Nm³) of flue gas, essentially halving the impurities.

This power station has provided reliable power to the utility for more than four decades, ranking as the best-performing and lowest-cost generating station in the utility's fleet. The boiler was designed to burn coal with a low calorific value and an ash content above 40%. Producing fly-ash with a low carbon content proved beneficial for the cement industry, which relies on these properties to improve water resistance in cement.

To meet the latest emission regulations, a three-part programme is required to enhance the total precipitator capability in order to achieve levels of below 50mg:

1. **Upgrade and refurbish the SO₃ conditioning plant.**
2. **Change the technology on the ESP's transformers to convert them into high-frequency sets.**
3. **Upgrade and refurbish the ESPs to maximise dust collection efficiency to comply with new legislation.**

Babcock has been awarded the third portion of the programme and will refurbish four precipitator cases in each boiler beginning in 2023.

Dave Brook, Technical Director at Babcock, explains that ESPs use an electric charge to remove impurities from air or gases through a series of collector and discharge electrodes. "Fly ash is a very fine dust found in hot flue gases from coal combustion. It travels through the heat transfer surfaces of the boiler and the air heater, and eventually emerges through the ducting and through electrostatic precipitators. After it is removed and deposited in the hoppers below, the fly ash is either removed or sold to the cement industry," Brook says.

"The fine dust in the gas travels a torturous route in the boiler, resulting in areas where there is more dust, and others with less dust. In order for the ESPs to function optimally, the gas distribution should be as homogenous as possible," adds Brook. He explains that an ESP is a box with a series of electrodes or plates strung vertically inside of it. The dust particles are charged creating a flow to the collector electrodes upon which the dust is deposited and collected. When these plates get full, they are rapped (struck), and all the dust slides down into the hopper.

Babcock will use computational fluid dynamics modelling, which was not available in the 1980s, to model the gases from the outlet of the boiler into the precipitator cases, to better understand and manage what is happening with the gases under different load conditions and improve dust distribution, thereby improving dust collection and removal.

Also included in Babcock's scope of work is the replacement of the current wire-type discharge electrodes with modern and more reliable rigid discharge electrodes. After time, the 12-metre long weighted discharge electrode wires have started to perish, diminishing the electric, or corona field, causing the collector electrodes to lose efficiency and collect less dust. The new rigid discharge electrodes, which will be manufactured in South Africa, cannot break and will create a more stable corona field, thereby maximising efficiency of the ESPs.

Babcock is the lead contractor responsible for all project management, integration, delivery and construction for the project, and will be working in partnership with USA-based Babcock & Wilcox (B&W). B&W owns the technology of the original design of the precipitators and will be undertaking the process and detailed engineering.

As one of the most established and experienced steam generator and industrial plant suppliers in Africa, Babcock has delivered solutions to many of the power stations in the country. Babcock is present at several sites undertaking projects that include high-pressure piping, coal burner overhauls and mill maintenance.

Powerscreen CT100 Stacker, USA

ELB EQUIPMENT LAUNCHES NEW RANGE OF POWERSCREEN MOBILE CONVEYORS

Efficiency, productivity and increased stockpile capacity are just some of the benefits available from ELB Equipment's latest offering of Powerscreen mobile conveyors.

The latest range of Powerscreen mobile conveyors offers reduced crushing and screening costs with the use of mobile conveyor loading solutions and can replace more costly loading equipment in many applications. The manufacturer has one of the largest ranges of off-the-shelf mobile conveyor systems globally. Wakefield Harding, ELB Equipment national sales manager for mining, says "the range has tracked conveyor mobile machines ranging from 21 to 30 m and from 500 to 1000 tons per hour (tph). The tracked radial mobile conveyors range from 20 to 24m and 500 to 1000 tph with stockpile capacities of up to 7500 cubic meters at 180 degrees"

Large range

"The fully mobile tracked hopper feeder ranges from 15 to 23m with hopper capacity from four cubes to 10 cubes with a low-level feeder option that can be fed via loader or excavator directly and has a capacity of seven m³. We also have lattice frame and telescopic conveyors up to 50m." Wakefield adds.

"Furthermore, all the mobile conveyors can be run on automated programme as an optional extra. The advantage of this range of Powerscreen mobile conveyors is that they prevent degradation and segregation of materials meaning that it does not separate fines and heavy materials during the stockpiling process and prevents degradation of material as it is stockpiled.

"This is a key feature in ensuring the improvement of material quality. In addition, the pin less deployment feature allows the operator to adjust the stockpile angle "on the fly", which in turn, reduces downtime and the chances of blockages at the head drum. This also results in the machine having a faster set-up time. The mobile conveyors also help in the reduction of site traffic, labour and because of their robust design, maintenance costs."

Proven record

ELB Equipment's "best of breed" approach ensures that clients are supplied with the world's best equipment for their specific needs by the country's top single supplier. With over 10 years of experience under their belt in the supply of mobile conveyors, the company has been the most successful in the country. The company has a history of customers operating several mobile conveyors – contractors, aggregate, remining and some have up to seven working on different parts of their respective projects. Their supply of Powerscreen mobile conveyors means that any company looking to maximise productivity and efficiency would naturally opt to add these conveyors to their fleet.

With ELB Equipment's commitment to providing clients with global standard equipment and comprehensive aftermarket service, the company has a large fleet of field service vehicles to ensure its equipment performs at optimal levels with maximum availability. It has a large footprint across South Africa including major cities as well as across other SADC countries (Namibia, Swaziland, Zambia, DRC and Zimbabwe).

Intermodal Connections, specialists in freight management and logistics solutions, has expanded its fleet of container handling equipment to meet growing demand for swift, safe and reliable cargo handling.

The new Meclift ML1812R multi-purpose forklift truck, with a lift height of 6 m, is the only machine in the lifting capacity range of 18 tons, that can be operated inside containers, for easy loading and unloading of cargo.

MODERN EQUIPMENT ENHANCES EFFICIENCIES IN LOGISTICS

BLT WORLD has recently delivered a new Meclift ML1812R multi-purpose forklift truck to freight management and logistics specialists - Intermodal Connections.

This multi-purpose reach truck, with a lift height of 6 m, is the only machine in the lifting capacity range of 18 tons, that can be operated inside containers, for easy loading and unloading of cargo.

“Reliable handling equipment plays a critical role enabling Intermodal Connections to provide the highest standard of service in an extremely demanding, time-sensitive environment. Many of our customers are exporters and importers in competitive markets and require absolute reliability in every part of the supply chain, to ensure cargo reaches its destination safely, in the most efficient and cost-effective manner,” explains Jo-Ann Mouritzen, managing director, Intermodal Connections. “Our first capital equipment investment in 2014, was a 45 T container handler that has since been enhanced by advanced materials handling machines, including variable reach trucks and forklifts.

“The investment in our new Meclift ML1812R variable reach truck has made it possible for us to handle a broader range of project cargo, steel plates and coils increasing our flexibility and improving overall productivity. These compact and robust reach trucks have been designed to move safely and swiftly in confined spaces. Specialised lifting attachments enable one machine to handle paper reels, automotive coils, steel plates and project cargoes, safely and efficiently. By combining the strength of robust handling attachments and the extended reaching ability of our latest Meclift reach truck, cargo handling operations are safer, faster and more cost efficient.”

BLT WORLD, which supplies a range of specialist materials handling equipment to diverse industries throughout Africa, provided operator training to the Intermodal Connections team, to ensure high efficiencies and enhances safety on site. The company also offers a technical advisory, spare parts and support service. Intermodal Connections efficiently handles all aspects of logistics and shipments, to ensure optimum efficiency of domestic and international trade. The company's cargo handling services include the handling of unitised commodities and breakbulk cargoes, unpacking and repacking of containers and cross docking.

A dependable freight, stock and document management completes our supply chain service, to and from any destination in the world.

TCM heavy-duty FD160-2, FD180-2, FD200-2 and FD230-2 machines, with capacities up to 23 ton, have been designed for high power, easy maneuverability and enhanced safety.

CRITERION EQUIPMENT'S RANGE OF TCM HEAVY-DUTY FORKLIFT TRUCKS EFFICIENTLY HANDLE HEAVY LOADS

Criterion Equipment's versatile range of TCM forklift trucks comprises robust machines for handling goods in all sectors, including heavy-duty applications.

TCM heavy-duty FD160-2, FD180-2, FD200-2 and FD230-2 machines, with capacities up to 23 ton, have been designed for high power, easy maneuverability and enhanced safety.

"We have many heavy-duty TCM forklifts currently in use in various industries around the country, that cope safely and efficiently with loads between 16 and 18 tons," says Brenton Kemp, Managing Director of Criterion Equipment, exclusive distributors in southern Africa of the TCM range. "Typical applications of our heavy-duty range are mostly in mining and related functions, as well as in general port yards and for moving heavy equipment and tooling during manufacturing. These flexible machines have also been well received locally for use in heavy-duty logistics applications, container yards and in warehousing and storage facilities.

"Advantages of using a heavy-duty forklift to handle heavy loads, rather than the investment in overhead or mobile cranes, include the efficient total cost of ownership over the economic useful life of the forklift and greater flexibility in terms of application and ease of mobility. An important benefit of using forklifts over other equipment is these machines are easily transportable to other locations." The most popular units in the TCM heavy-duty forklift range (FD160-2, FD180-2) have a 900 mm load centre, a maximum fork height of 3 000 mm and a mast tilt angle of 6° forward and 12° backward. The high power, internal combustion 6BG1T diesel engine (125 kW/2 200 r.p.m) meets emission levels required in Tier 2 emission control standards.

FD180-2 machines have a drawbar pull of 119 kN (12 100 kgf) at full load and gradeability with load at 1,6 km/h of 20% (11,3°) slope. TCM heavy-duty-forklifts have a three-speed automatic powershift transmission for easy control of the machine. Features include a finger touch shift lever, interchangeable easy drive selections between power modes, a dial switch to control the safest travel speed and a combined type switch lever for turning and light signals. Fully hydrostatic power steering enables precise control of the machine. Safety has been critical in the design of this series. Notable features for improved visibility include a cabin with a newly designed counterweight and no front or rear pillars, as well as a soft touch electric parking brake for added security.

Other advanced features include a newly designed fuel tank with increased capacity from 300 litres to 400 litres, which extends operating time without the need for re-fuelling. The TCM design team constantly upgrades the design of its extensive range of forklift trucks to ensure greater controllability, enhanced safety, minimal maintenance requirements, improved environmental cleanliness and operator comfort. Apart from Criterion Equipment's technical advisory and support service, the company also offers a refurbishment service. This comprises cosmetic overhauls and general maintenance and repairs – to ensure optimum performance, enhanced safety, low maintenance and extended service life of every machine. The company's national workshops are able to completely refurbish an existing machine according to OEM specifications and also adhere to industry specific customisations for standards in heavy-duty applications, including mining, refineries and furnace installations.

earthbroker

your sourcing solution for new & used equipment & machinery

The Earthbroker is published monthly and 5400 copies are sent to all the mines, quarries, and all companies dealing with earthmoving and construction in South Africa, Africa and some overseas countries.

We are **ABC accredited**.

We also have a website where anyone can view the magazine, which is updated monthly with the latest changes and advertisements. Please view our E-Mag on www.earthbroker.co.za

Our E-magazine is uploaded monthly to Facebook, Instagram, LinkedIn and our mobile App.

We accept about 5 editorials a month which we insert free of charge. Should you have an editorial which is relevant to the industry, we will gladly give it consideration.

For details of our prices on a full page, half page or quarter page, please phone me on 083 456 4027 or e-mail me at janine@earthbroker.co.za.

We do not ask anyone to sign a contract, however we do insist on a **full calendar month's notice** for cancellation.

Please note that all quotations exclude VAT. We do insertions, (own printing costs) at R1.50 each excluding VAT.

Classifieds at R500.00 excluding VAT for a business card size advertisement only.

Janine Sargeant
(CELL)083 456 4027
janine@earthbroker.co.za

**Should you want to receive a free copy of our magazine
please email your details to janine@earthbroker.co.za**

Conditions of Acceptance for advertising

Adverts are subject to the following conditions:

1. Often we receive faxes with illegible letters or numbers. We accept no responsibility due to this.
2. We accept NO responsibility for errors in advertisements received telephonically.
3. We reserve the right to refuse placement or to place the advertisement/s as we see fit.
4. No responsibility will be taken for omission of advertisements, for any errors/colour-differences in advertisements or any results due to such errors.
5. We accept no responsibility for the quality of goods advertised. We merely bring buyers and sellers into contact with each other and we are not responsible for any results due to transactions made through the advertisements.
6. Please note one full calendar months written notice for cancellations.
7. Payment due prior to publication or interest will be charged.
8. There will be an annual increase of 10% at the beginning of each year.
9. The Earthbroker will not be held responsible for content of any advert inserted in our magazine.
