Mesh Gear

Precision In Motion

50 YEARS 1976 – 2026

Your Gear Manufacturing Specialist

At Mesh Gear we believe that quality and attention to detail is our competitive edge

For 50 years, Mesh Gear has been a trusted manufacturer of high-performance gears and driveline parts serving leading OEM and aftermarket customers across South Africa and internationally.

PRODUCT RANGE

- Hardened and ground Gears
- Precision Crown Wheel and Pinions
- Worm Wheels and Ground Worm Shafts
- Hard Rock Drilling and Shank Adaptors / Couplings
- Induction Hardened Shafts, Yokes and Flanges
- Internal Splines and Ring Gears

CAPABILITIES

- In-House Heat Treatment with Full Metallurgical Laboratory
- Advanced 5-axis Milling
- High Precision CNC Gear Grinding
- Latest CNC Gear Tester (CMM)
- Induction Hardening
- Shotpeening
- Robust Final Inspection Protocols
- Batch Flexibility: 1 to 1,000 units

50 Years = Reliability + Peace Of Mind

INDUSTRIES WE SERVE

- Off-Highway Earth Moving vehicles
- Coal Mining Equipment
- Crushing and Screening
- Industrial Gearboxes
- Agriculture
- Rail

SYSTEM CERTIFICATION ISO 9001:2015 SGS

Valid for a limited 1-year promotional period.

NEW-GENERATION PERFORMANCE
C32 engine repower delivers more power, lower emissions and improved fuel efficiency.

OUTSTANDING VALUE
Complete rebuild and repower at a cost well below new truck prices without compromising durability.

MAXIMUM UPTIME. MAXIMUM LIFE.
Engineered to OEM standards. Built to perform. Built to last. Backed by e-Qwip.

WHAT'S INCLUDED

- Frame stripped down, sandblasted and NDT tested
- CAT Reman C32 Engine – Repower
- CAT Reman Transmission
- CAT Reman Final Drives
- CAT Reman Hydraulic Pumps
- CAT Reman Torque Converter
- Steering cylinders – recondition new seals and bearings
- Hoist cylinder – recondition new seals and bearings
- Front suspension cylinders – recondition new seals and bearings
- Rear suspension cylinders – recondition new seals and bearings
- Steering Tank – Reseal
- Hydraulic Tank – Reseal
- New cooling package (radiator, aftercooler, AC condenser and fuel cooler)
- Machine electrical Harness – recondition
- Front Hubs – new brakes (discs and pads), new seals and bearing
- Cab – Reconditioned
- Air compressor – New
- Engine Cooling Fan – New
- Drive shafts – Reconditioned
- Air intake hoses – New
- Powertrain hoses – Replaced with Cat hoses
- Steering Hoses – Replace with Cat hoses
- Hydraulic Hoses – Replaced with Cat hoses
- Reconditioned differential with new gears, bearings and seals

OUR ROBUST REBUILD PROCESS

Every Cat® 777D rebuild is completed by highly skilled technicians using genuine Cat® components and OEM processes to deliver uncompromised quality and reliability.

1 STRIPPED & SANDBLASTED

2 CAB RECONDITIONED

3 CAT REMAN COMPONENTS

4 COMPONENT REBUILD

5 NEW FRONT LOOK

6 READY FOR WORK

WARRANTY
24 MONTHS / 8000HRS
CAT POWERTRAIN WARRANTY

C32 ENGINE REPOWER
New-generation C32 delivers more power, lower emissions and up to 10% better fuel efficiency.

BUILT TO LAST
Every rebuild is completed to OEM standards using genuine Cat® parts for unmatched durability and peace of mind.

The history of **Heavy Duty Diesel Parts** spans back to 2020. Against the backdrop of 15 years operational and strategic parts experience in the heavy duty European truck and yellow metal construction parts business in the form of MAN, VOLVO, JCB, Heavy Duty Diesel parts evolved into one of the largest wholesale distributors of JCB backloader parts in the country. Today marks the first shift in establishing the distribution of our own branded range of parts. Our ranges include and not limited to JCB 3CX 3DX , CAT 422 426 and 428, BELL 315 SG, SJ, SK.

We are in the process re-establishing and formalising our network partners, and are currently looking for mechanics, workshops and parts resellers to join our distribution network. Fleet owners are also most welcome to register their fleets for major discounts.

Savings of up 60% are on offer as well as up to 18 month warranties upon signing up for our joint partner distributor programs and major fleet loyalty programs. We boast over R150 million worth of stock. Our breadth of stock is increasing quarterly, with new ranges of CAT and BELL backhoe loader after market spares being introduced all the time.

At this time we offer our own ranges for the following categories:

- OE filters
- Turbochargers
- Starters and alternators
- Engine belts
- Belt tensioners
- Pistons, sleeves and rings
- Gasket sets
- Crankshafts
- Hydraulic pumps and seal kits
- Hydraulic cylinders
- Track rods
- Pins and bushes
- Axle friction and counter plates
- Axle and transmission seals and bearings
- GET
- Electrical parts, switches and solenoids
- Wheel rims
- Radiators
- Propshafts

With significant depth and breadth of stock we offer industry leading availability and exceptional service levels. Paul (Port Elizabeth) and Clyde (Gauteng) have over 20 years experience each in JCB backhoeloader spare parts and are positioned to give the best service and advice for your parts requirements.

Additionally we offer new, service exchange and repairs on engine assemblies, gearboxes and axles.

We have parts distribution locations in:
Johannesburg | Port Elizabeth | Polokwane | East London | Cape Town | Durban | Gaborone

BRAKESAFE WHEEL END BRAKES

Fail-Safe brakes for Toyota Hilux underground

SIBS® IV | TERRA DURA® | SIBS® IV DRIVELINE

SIBS is designed to operate in the toughest conditions on the planet. SIBS Technology provides a safer operating environment for vehicles from underground mining to high speed on the open road, to towing heavy loads. Being fully sealed has the additional benefit of producing no harmful emissions, making SIBS brakes environmentally sustainable.

DISA Equipment has recently launched the new Develon DB100AS-2KM backhoe loader in Southern Africa. These durable machines have been developed for high efficiency in many sectors, including construction, municipalities, agriculture and infrastructure.

DURABLE BACKHOE LOADERS DIG DEEP

DISA Equipment has recently launched the new Develon DB100AS-2KM backhoe loader in Southern Africa. These machines have been developed for high efficiency in many sectors, including construction, municipalities, agriculture and infrastructure.

The new DB100 series forms part of the wide range of robust Develon earthmoving equipment, which is designed to give operators maximum performance, precision control, versatile machine preferences, greater comfort and long service life. DISA Equipment specialists believe that the new Develon TLB will meet the requirements of equipment owners looking for a balance between loader productivity, excavation precision and transport speed in a single machine.

The DB100 series is engineered to deliver higher breakout force, increased traction and extended reach in both loader and backhoe functions. The Kirloskar mechanical engine EU Stage II (96 HP) ensures high power, reliability and efficiency in tough operating conditions. The hydraulic system is engineered for smooth, responsive performance in both loader and backhoe functions, delivering strong breakout force and precise control in a wide range of operating conditions.

Four-wheel drive is standard across the range, with planetary front and rear gears designed for heavy-duty operation. Wet disc service and parking brakes are oil-immersed to minimise contamination and extend service life.

Forward travel speeds reach up to 40 km/h, enabling safe and efficient road movement between sites. Manual synchro shift transmission is standard on DB100AS-2KM machines. Backhoe working depth reaches up to 4,770 mm in standard side-shift configurations and up to 5,830 mm with the optional telescopic dipper. Maximum digging height is 5,980 mm in standard form and 6,890 mm with telescopic extension. Loader dump height is rated at 2,960 mm, with hinge pin height at 3,610 mm. Payload capacity is specified at 2,000 kgf.

The operator-friendly cabin has been designed for visibility and easy control. A one-piece curved front windscreen and large side glazing provide a clear view, while the sloped bonnet improves visibility to the loader cutting edge. The ROPS/FOPS-certified cab incorporates an adjustable steering column, suspension seat and ergonomically positioned controls. The parking brake can be easily activated from within the cab via an electric switch. Optional climate control provides heating, defrosting and air conditioning via multiple air vents positioned throughout the cabin. A high-strength, rigid loader frame ensures durability and greater lifting capacity.

Operation is enhanced through the optional Smooth Ride Control system, which reduces loader bounce when travelling over uneven terrain. Adjustable Flow Control optimises travel power during highway travel, while pilot controls and telescopic dipper options increase precision and versatility in excavation tasks. These new TLBs ensure high efficiency in heavy-duty applications. The boom allows clear visibility into the trench when the operator is digging around buried obstructions, like utility lines, sewer pipes and water mains. Another important feature is the integrated safety bar and locking pin which form part of the bucket cylinder for enhanced operator safety.

For effortless service and maintenance, a tilt-up hood provides unobstructed access to the engine compartment. Greasing points are easily accessible from ground level and a visible hydraulic oil sight gauge allows quick inspection. A single-layer radiator cooling system simplifies cleaning. A wide range of specially designed attachments ensures versatility for use in diverse applications. Loader options include general purpose and multi-purpose buckets, fork variants with load capacities up to 1,200 kg, log forks, sugarcane grabbers, biomass buckets and a 600-litre concrete mixer. Backhoe attachments comprise trench and light-duty buckets, as well as a hydraulic rock breaker rated for oil flows between 60 and 90 litres per minute. The launch of the Develon DB100 series meets the demand locally for a durable, high-capacity backhoe loader, that can handle many different tasks in tough conditions. These dependable machines offer greater digging depth, breakout force and travel efficiency, without unnecessary electronic complexity. On-site testing in arduous environments highlights the stability of the four-wheel steer configuration and the improved material retention provided by Smooth Ride Control during site travel. Service accessibility at ground level is an important design feature of these machines.

In addition to backhoe loaders, DISA Equipment's Develon range includes excavators, articulated dump trucks and wheel loaders. The company also supplies and supports a range of Everdigm attachments, including hydraulic breakers suitable for excavators from 5 ton to 100 ton.

The team's advisory service on correct equipment selection is enhanced by a broad branch and dealer network offering technical support, easy access to quality branded spare parts, reliable repair and maintenance, as well as Develon Operator Machine Orientation Services.

The new MOBIREX MR 130 EVO mobile impact crusher is powerful, flexible, and easy to operate.

KLEEMANN | THE NEW MOBIREX MR 130 EVO MOBILE IMPACT CRUSHER

New generation impact crusher with innovative features

Kleemann presents the successor to the popular MR 130 EVO2 in the form of the MOBIREX MR 130 EVO mobile impact crusher. The machine offers impressively low fuel consumption, high performance, and flexibility. The new MOBIREX MR 130 EVO impact crusher with D-DRIVE drive concept will initially be available in Europe from early 2027. Other markets will follow in turn.

Optimum final product quality and high plant performance
The MOBIREX MR 130 EVO impact crusher is a versatile solution and impresses with a high continuous throughput. Applications range from various recycling tasks, such as the processing of concrete, mixed material, and asphalt, through operations with soft to medium-hard natural rock. Thanks to the optional double-deck post screening unit, up to two classes of final product can be produced and the target grain can be split into two separate material flows. Wind sifters can remove lightweight material such as wood and plastic from both oversize grain and medium grain. The swiveling middle grain conveyor also enables subsequent merging with fine grain for even better final product quality.

High-performance crusher direct drive, continuous crushing process
The updated D-DRIVE diesel direct drive concept with the newest generation of engine gives the MOBIREX MR 130 EVO excellent fuel efficiency. As part of this, all secondary drives, such as vibrating chutes and conveyor belts are driven electrically. One load-dependent fan reduces noise emissions.

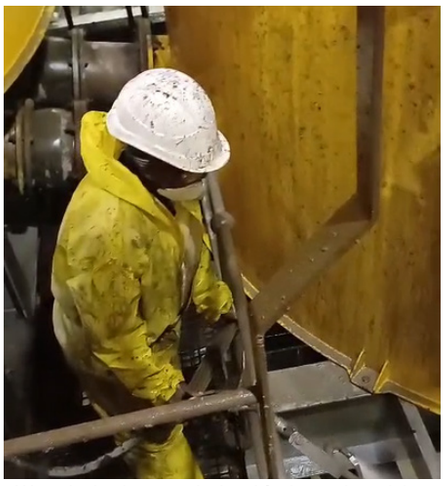

The CFS (Continuous Feed System) monitors the utilization of the crusher and the engine to guarantee continuous material conveyance. This optimizes the crusher utilization, reduces the wear, and delivers excellent material quality.

Smart operating concept for simple plant operation
With the intuitive holistic SPECTIVE operating concept from Kleemann, the operator has a variety of tools to take the hard work out of their working day. SPECTIVE CONNECT simplifies the digitalization of the plant on the construction site. All important data is transferred to the smartphone or tablet, making reporting easier. Detailed troubleshooting guides in SPECTIVE CONNECT provide support – meaning less downtime, higher productivity, and more revenue.

Operating convenience at the push of a button
The MOBIREX MR 130 EVO features fully automatic crusher gap adjustment and zero-point determination. Adjusting the gap setting is simply a matter of pressing a button, making the laborious task of manual measurement on the machine a thing of the past. The zero-point determination feature compensates for wear during crusher start-up and ensures a homogeneous crushing product. Another added convenience is found in the tool-free opening of the crusher: In just 30 seconds, you can have a full view into the crushing chamber. This allows for fast visual inspection and makes replacing the blow bars simpler.

The optional double-deck post screening unit means the MOBIREX MR 130 EVO from Kleemann can produce up to two classes of final product.

Water jetting is a practical tool for improving mining and industrial efficiency

Material build-up inside a silo can progressively reduce effective capacity, restrict material flow and contribute to operational bottlenecks.

Raymond Graham, Chief Executive Officer at Bongela Mining & Industrial Services

WATER JETTING IS A PRACTICAL TOOL FOR IMPROVING MINING AND INDUSTRIAL EFFICIENCY

High-pressure water jetting can do more than remove difficult build-up. Used appropriately, it can support equipment maintenance, improve operational performance and help reduce the disruption associated with cleaning and maintenance activities

In mining and industrial environments, accumulated material, blockages and deposits can affect the performance of equipment and infrastructure, creating maintenance challenges and potentially disrupting operations. While cleaning is often regarded as a routine maintenance activity, the method used to remove these deposits can have a direct bearing on how efficiently the work is completed. High-pressure water jetting provides a versatile approach to tackling difficult build-up while supporting the maintenance of critical plant and infrastructure. For Bongela Mining & Industrial Services, water jetting forms part of a broader range of specialised services aimed at helping mining and industrial operations maintain, clean and refurbish the infrastructure on which production depends.

Tackling difficult build-up

Mining and industrial processes can result in material accumulating on equipment and structures over time. If left unaddressed, build-up can restrict flow, interfere with equipment performance and make subsequent maintenance more difficult.

High-pressure water jetting provides an effective means of removing such deposits, allowing equipment and infrastructure to be cleaned without relying solely on manual intervention. Applications can extend across different areas of a plant, depending on the nature of the material involved and the equipment being cleaned. Bongela's service offering includes the cleaning and removal of build-up in flotation cells, as well as high-pressure cleaning of plant structures and mills. The company also provides hydro mining and slurry removal services for applications including process water dams, tailings thickeners and dams. "Water jetting can be a highly effective maintenance tool when the approach is matched to the application. The objective is not simply to remove material, but to do so efficiently and safely while helping clients maintain the performance of their equipment and infrastructure," comments Raymond Graham, Chief Executive Officer, Bongela Mining & Industrial Services.

Efficiency starts with the right approach

The effectiveness of water jetting depends on more than simply applying high-pressure water. Different equipment, deposits and site conditions require an appropriate approach, making it important to consider the application before work begins. Factors such as the type and extent of build-up, the equipment or structure being cleaned, access requirements and the operating environment can all influence the appropriate cleaning solution. For mining operations in particular, maintenance activities also need to be considered in the context of production. Equipment that is unavailable for extended periods can create operational disruption, making efficient maintenance an important part of overall productivity. Using an appropriate cleaning method can help maintenance teams address deposits and blockages as part of planned intervention, rather than allowing accumulation to become a larger operational challenge.

Supporting preventative maintenance

Water jetting can also form part of a preventative maintenance strategy. Regular cleaning and removal of accumulated material can help maintenance teams maintain equipment and infrastructure before build-up contributes to more significant performance or maintenance problems. Cleaning can also provide an opportunity for teams to assess the condition of equipment and identify areas requiring further attention. This complements Bongela's wider service offering, which includes silo cleaning and inspection, structural repairs and refurbishment, concrete and civil works, refurbishment and reinstallation of discharge chutes and feeders, conveyor belt maintenance and installation, and inspection and repairs to thickeners. The approach is therefore not limited to a single cleaning intervention. Water jetting can form part of a wider maintenance programme focused on keeping critical infrastructure functional and supporting the useful life of existing assets.

Safety is part of the solution

Mining and industrial maintenance can involve difficult working environments and challenging access requirements. Cleaning methods therefore need to take account not only of effectiveness, but also of how the work can be undertaken safely. A suitably planned water jetting solution can help address difficult-to-access areas and reduce some of the challenges associated with removing accumulated material manually.
However, the equipment, pressure and cleaning method need to be appropriate to the application and undertaken by suitably experienced personnel. For Bongela, this forms part of its broader emphasis on providing practical and safe solutions for demanding mining and industrial environments.

Combining specialist capability with practical application

One of the advantages of using an experienced industrial services provider is the ability to consider cleaning within the context of the wider condition and operation of the plant. Bongela combines water jetting and hydro mining capabilities with civil construction, refurbishment, structural repair, inspection and maintenance services. This allows the company to approach cleaning requirements as part of the broader maintenance needs of an operation. For clients, the objective is ultimately to keep equipment and infrastructure performing as intended while minimising unnecessary disruption to production. Water jetting is therefore more than a cleaning technique. When appropriately applied, it can be a practical maintenance and efficiency tool, helping mining and industrial operations address build-up, maintain equipment and infrastructure, and tackle maintenance requirements before they become larger operational challenges.

earthbroker

your sourcing solution for new & used equipment & machinery

Reasons to advertise in the Earthbroker

The **Earthbroker** magazine is an excellent medium for advertisers in the earthmoving, mining, construction, forestry and agriculture industries. If you are a company that provides services or products related to either of the industries, you should consider advertising in Earthbroker for the following reasons:

1. **Targeted Audience:** The Earthbroker has a targeted readership consisting of professionals and individuals involved in the construction and earthmoving industry. These readers are potential customers for your business, making the Earthbroker an effective way to reach your target audience.

2. **High Readership:** The Earthbroker has a high readership among industry professionals, including contractors, engineers, construction and earthmoving company owners. Advertising in the Earthbroker can help you reach a large number of potential customers.

3. **Reliability:** With over 20 years in the Industry, Earthbroker offers advertisers reliable peace of mind for sellers selling their services , machines, or spare parts.

4. **Credibility:** The Earthbroker has a reputation for providing reliable and trustworthy information about the construction and earthmoving industry. By advertising in the Earthbroker you can help establish your business as a reputable and trustworthy source of products and services.

5. **Brand Awareness:** Advertising in the Earthbroker can help increase brand awareness for your business. By consistently advertising in the Earthbroker, you can build a strong brand presence and establish your business as a leading provider of products and services in the construction and earthmoving industry.

Why deal with different people each month when you can deal with the same friendly people you always deal with.

We do not ask anyone to sign a contract, however we do insist on a full calendar month's notice for cancellation.

Please note that all quotations exclude VAT.

We do insets (own printing and delivery costs) at R1.50 per insert, per month, excluding Vat.

Your advert is advertised FREE on our website and digital magazine which is uploaded to Facebook, Instagram, LinkedIn and our Mobile App.

We design FREE of charge and all changes are done FREE of charge.

We are proudly South African.
Support your country who understand your needs.

For details of our prices on a full page, half page or quarter page, please call me on **083 456 4027** or e-mail me at **janine@earthbroker.co.za**.

Should you have people/companies you would like added to our database, we will happily do that should they not already be on our database.

Please call us for a prompt response and great service!

For further info on how to get your company listed in the Earthbroker please call...**Janine - 083 456 4027**

The Earthbroker is published monthly and 5400 copies are sent to all the mines, quarries, and all companies dealing with earthmoving and construction in South Africa, Africa and some overseas countries.

We have a website where anyone can view the magazine free of change. The website is updated monthly with the latest changes and advertisements. Please view our E-Mag on **www.earthbroker.co.za**

Our E-magazine is uploaded monthly to Facebook, Instagram, Linkedin and our mobile App.

We accept about 5 editorials a month which we insert free of charge. Should you have an editorial which is relevant to the industry, we will gladly give it consideration.

For details of our prices on a full page , half page or quarter page, please contact me on 083 456 4027 or e-mail me at janine@earthbroker.co.za.

We do not ask anyone to sign a contract, however we do insist on a **full calendar month's notice** for cancellation.

Please note that all quotations exclude VAT. We do insertions, (own printing costs) at R1.50 each excluding VAT.

Classifieds at R500.00 excluding VAT for a business card size advertisement only.

Janine Sargeant
(CELL) 083 456 4027
janine@earthbroker.co.za

Should you want to receive a free copy of our magazine please email your details to janine@earthbroker.co.za

Conditions of Acceptance for advertising

Adverts are subject to the following conditions:

1. All requests for changes are to be put in writing and emailed to us. We will not accept responsibily for Instructions given verbally.
2. We accept NO responsibility for errors in advertisments received telephonically.
3. We reserve the right to refuse placement or to place the advertisment/s as we see fit.
4. No responsibility will be taken for omission of advertisments, for any errors/colour-differences in advertisments or any results due to such errors.
5. We accept no responsibility for the quality of goods advertised. We merely bring buyers and sellers into contact with each other and we are not responsible for any results due to transactions made through the advertisments.
6. Please note that one full calendar months written notice is required for all cancellations.
7. Payment due prior to publication or interest will be charged.
8. There will be an annual increase of 10% at the beginning of each year.
9. The Earthbroker will not be held responsible for content of any advert inserted in our magazine.
