# LALABOOM IN SHORT

**Since its launch in 2018, LALABOOM has taken up a major challenge :**

To present an alternative to toys that lead to waste and over-consumption, by offering educational toys that are innovative, universal and most importantly, grow with your child.

**LALABOOM beads and toys provide STEP-BY-STEP support to children from 10 months to 4 years old** as they learn motor skills that are essential to their proper development. Our toys are genuine developmental tools that are designed for long-term use.

**LALABOOM toys take up the main principles of the Montessori method :** an invitation to children to learn at their own pace, with respect for their freedom and agency while encouraging the exploration of their senses and abilities, through experimentation and play.

Lalaboom beads offer children the opportunity to discover and develop their skills, one step at a time. Large beads to screw in, clip, assemble and lace up allowing little ones to build a multitude of multi-coloured and varied combinations, while developing new motor and cognitive skills.

**10 months**, children are ripe for sensory exploration and the development of visual acuity through various textures and colours of the beads that they begin to assemble.

**15 months**, toddlers can open and close beads.

**18 months**, children can mix the beads and create several combinations.

**24 months**, children can create long strings of beads and explore their creativity.

**36 months**, children can lace up the beads using the included lacing tool. These are the first steps to learning how to write!

**Thanks to this smart and unique system...**

Children can connect the beads and the other Lalaboom toys together for **infinite play possibilities !**

# QUALITY AND DESIGN

For **LALABOOM**, safety is not a game. All of our toys undergo strict inspection and a rigorous series of tests to ensure they meet standards and are completely safe for children. We work with approved and independent laboratories to confirm the compliance of our products, from their design to final production.

LALABOOM products meet all international standards in force in Europe (CE), in the United States (ASTM), Canada (SOR), and Australia (ISO).

Our production site has been **approved by the ICTI and BSCI** organizations, which inspect and ensure ethical conduct and adequate working conditions in the production of our toys.

# ONE SYSTEM, INFINITE POSSIBILITIES !
