

A Public Benefit Corporation

2025 Annual Report

Letter From the Co-President

Dear Friends and Partners,

For the team at QC-Health, 2025 became a pivotal year. A multiyear strategic plan came together as we coalesced advancements in technology, messaging, and process. Our North Star has been simple: Make it easier for clinicians to do the right thing and faster for their patients to get the right therapy. Access to therapy for patients has become increasingly complex with widening gaps, which underscores the growing importance and urgency of our mission and support. By reducing rework, prior authorization surprises, and avoidable back-and-forth with pharmacies and plans, we’re freeing up precious clinician time for patients, not paperwork.

This past year, the QC-Health team strengthened tools and workflows that surface timely, clinically relevant notifications and information to prescribers. While much of this progress happened “behind the scenes” in data, connectivity, and workflow design, its impact shows up in very human terms—patients starting appropriate therapies sooner and staying on them more consistently.

Our expertise now spans diverse, difficult-to-treat therapeutic areas, including cardiology, chronic kidney disease, diabetes, liver disease, oncology, and schizophrenia. By fostering strategic partnerships and expanding our network, we have grown our reach and positively impacted many lives. Today, our QC-Health Network includes millions of providers, enabling us to deliver targeted, tech-driven notifications that improve outcomes.

We also advanced demonstration projects with pharmacy benefit managers (PBMs), deepening integration so that coverage, affordability, and utilization insights can be delivered in more connected ways to the point of care. These collaborations are an important foundation for the next phase of QC-Health’s growth and impact, helping us prove that better alignment among PBMs, clinicians, and health systems is both achievable and sustainable.

None of this would be possible without our extraordinary team and partners. Thank you for your dedication, your creativity, and your unwavering focus on patients and clinicians.

As we look forward to the future, we remain dedicated to collaboration and innovation. We invite individuals and organizations to join us in our mission to transform healthcare and achieve even greater results together.

Let’s get to work!

Stacey Richter
Co-President of QC-Health, Inc.

Our North Star has been simple: Make it easier for clinicians to do the right thing and faster for their patients to get the right therapy.

Benefit Corporation

A benefit corporation is a type of corporate entity that includes positive impact on society, workers, the community, and the environment as part of its legally defined goals.

The business purpose of QC-Health, Inc., is to be a general public benefit corporation that provides services and free or low-cost health tools for the improvement of human health.

The genuine intent of the individuals behind QC-Health is to help clinicians realize a shared mission to help improve patient outcomes.

As a cause-driven benefit corporation, our mission is to help healthcare organizations deliver better care by identifying unmet needs, aligning with provider priorities, and catalyzing innovation.

QC-Health is the trusted source for stakeholders across the healthcare continuum, including point of care (providers of care and health systems), payers, pharmacy benefit managers (PBMs) and plan sponsors, innovators and life sciences companies, data and analytics providers, pharmacies, and other stakeholders seeking to make meaningful improvements in patient health.

Stacey Richter

Co-President, QC-Health, Inc.

Stacey has helped guide QC-Health from its inception. She is also the co-president of Aventria Health Group and the host of the Relentless Health Value™ podcast.

Dave Dierk

Co-President, QC-Health, Inc.

Dave is a thought leader in pharmaceutical diagnostics, biomedical, long-term care, managed care, employer, and pharmacy communications. His human approach to clients and his vision for care help elevate our relationships.

John F. Rodis, MD, MBA, FACHE

Benefit Director, QC-Health, Inc.

John served as president of Saint Francis Hospital, a large teaching hospital, from 2015 to 2020. His learned leadership has enabled QC-Health to establish therapeutic expertise in an evolving list of categories.

Overview

At QC-Health, patients are our North Star who guide our purpose, direct our focus, and ignite the passion that drives everything we do. We improve health outcomes—not just in theory but in practice, at scale, and with lasting impact. Since beginning in 2019, our mission has remained steadfast and loyal to the healthcare community.

Our expertise includes work in high-impact/difficult-to-treat therapeutic categories that have cost and/or outcome challenges, such as cardiology, chronic kidney disease, diabetes, liver disease, oncology, and schizophrenia.

As our vision has grown, our reach has also broadened. By strategically fostering new collaborative partnerships, we have extended our connections and engaged with a wider audience. We have had the opportunity to touch more lives and change more outcomes than ever before. Our work is still not done.

We are excited about what lies ahead, and there is so much more to do. We remain committed to advancing our collaboration with new partners and welcome individuals and organizations interested in supporting our mission.

Where Are We Today?

Through our evolving partnerships and therapeutic expertise, we have extended our reach into cardiology, diabetes, mental health, oncology, and tech-driven care. We have also worked diligently to understand the affordability issues facing patients and the gaps we can help to close.

Notable accomplishments include the following:

- **Our comprehensive work in patient affordability has enabled us to address the growing concerns of patients and clinicians**, leading to greater understanding and proactive measures.
- **The QC-Health Network numbers millions of providers**, which enhances our ability to deliver targeted healthcare solutions at scale.
- **We deliver precise, timely workflow messaging** through integrating real-time data streams into the QC-Health Network.
- **Our board of advisors and working groups of industry leaders continue to grow and guide focused solutions** that improve patient outcomes and reduce healthcare costs.

Our efforts are changing lives. Our technology and insights from our network are changing the future of care. They are connecting patients and physicians in important ways that help change lives.

The Prescriber Notification Platform, which communicates with clinicians at the right moment in the workflow, helps optimize therapy initiation, reduce friction across the treatment journey, and improve outcomes. This common goal of better outcomes is bolstered by the increasing the number of healthcare professionals in our network as well as the guidance provided by our working groups and expert partnerships.

As we embrace the momentum we have created, we continue to ask the tough questions to determine how we can expand the scope of our mission. In fact, another area that requires our attention revolves around affordability.

- What more can we do to help affordability and access to help patients start and maintain therapy?
- How can we help patients afford their medications without having to make untenable choices such as rationing them or skipping them altogether?

Where Is QC-Health Going?

From the Prescriber Notification Platform to additional innovative solutions that have the potential to bolster healthcare. From affordability to a technology-driven set of utilities that help change behavior. Our focus remains on the bigger mission: to improve lives.

Our commitment to leveraging technology and innovation holds immense promise for the future of healthcare, outcomes, and patient well-being. This approach prioritizes our North Star—patients—and enables us to fulfil our mission in new, expanded ways.

We have recognized both the need and the answer—one deeply rooted in technology and connected to the strength of our network. Above all, it's the ethical choice.

More advancements are expected as we unlock greater opportunities to impact patient care and the healthcare system as a whole.

This emphasis lets us put care at the forefront and further advances our mission to improve health outcomes.

Looking Ahead

2026 Goals

Objectives:

- Innovate the treatment journey to change behavior, streamline care, and improve outcomes.
- Drive a greater understanding of the patient and care partner journey.
- Maintain our momentum to offer even greater insights into the clinical workflow in a meaningful way for an expanding list of therapeutic areas.
- Leverage technology to improve more lives in more therapeutic areas.

What does success look like in 2026?

- More tools. More solutions. More lives improved.
- Continuing to evolve our own understanding and expertise through partnerships in therapeutic areas, of which we have only scratched the surface

Our Mission-driven Board of Advisors

Sponsored and Operational

Our passionate group of advisors embraces the mission and vision of QC-Health—from clinical professionals across a wide range of therapeutic areas to technology and data mavens who are helping to bring our lofty goals to life.

Those advisors include:

Scott Rybak

With more than 20 years of deep expertise, including leadership with CoverMyMeds®, Scott has been responsible for partnership activities focusing on PBMs, health plans, and EMR vendors.

Guy Lehman

As the leader in data and data privacy at Walmart, Guy has leveraged that experience to lead organizations in the healthcare space to strengthen their data practices and governance.

Conclusion

We, again, are pleased to report that in 2025 the momentum that we created since our inception has increased effectiveness and continues to change behavior.

Through our growing network and partnerships, through our technological capabilities, and the power of QC-Health expertise, we continually adapt and advance. The guidance and insights offered enable us to empower providers, patients, and the broader community. And we continue to actively pursue strategic clinical partners to further our mission.

Our programs provide valuable information to both clinicians and patients. Our commitment to broadening our reach through our network and exploring new therapeutic domains has strengthened our determination to improve health outcomes.

Looking ahead to 2026, we anticipate significant opportunities for growth and advancement. With new partnerships and initiatives poised to positively impact many lives, we remain focused and prepared for the future.
