## 2023-2024

# THE BERGNER GROUP

REFINING EVERYDAY LIFE

SINCE 1999

The Bergner group is a leading houseware company from Europe. With 20 years of experience in the houseware industry, we offer a complete portfolio with more than 10.000 houseware products in multiple categories with a multi-level positioning approach.

The Bergner group has solid self-owned distribution throughout Eurasia. Elsewhere, Bergner works with strategic partners in order to create synergy between industry and local market knowledge. This collaboration creates continuing growth for all parties involved.

[bergnergroupp.com](http://bergnergroupp.com)

# COOK & CHEF INSTITUTE

## OUR FOUNDATION

The Cook & Chef Institute is a Foundation comprised of figures from the world of international haute cuisine and Bergner who have come together to share strategic thinking about cooking and technological innovation in kitchenware.

The Cook & Chef Institute in order to contribute to reinforcing food safety guarantees for consumers and to improve information transparency, chooses and recommends products which have been subject to a prior full and comprehensive audit by a committee of chefs from the Institute.

The Cook & Chef Institute Foundation fosters research agreements and undertakes projects related to the use of new materials and coatings, as well as the usability and ergonomics of the kitchenware products in the food, gastronomy and kitchen appliance sectors.

More than 100 chefs and cooking schools.

[www.cookandchefinstitute.com](http://www.cookandchefinstitute.com)

## OUR QUALITY SEAL

Developed by a committee of experts the C&C Quality Seal is a market leading global brand that helps to build confidence in the products endorsed by the institute.

Our C&C Quality Seal set endorsement for good quality practice, and help provide assurance to your customers that your products are of the highest quality. The C&C Quality Seal was designed to help retailers and culinary centers to provide products and services of consistent quality, which would help them develop a powerful brand image towards their consumers, in addition to high marketplace positioning.

# MATERIAL GUIDE

## BERGNER MATERIALS

### MULTIPLY

MULTIPLE LAYERS. GREAT HEAT RETENTION

3-Ply / 5-Ply bring together multiple layers of material including Aluminium and Stainless Steel. Heat conducts efficiently, keeping the entire cookware in its best performance.

### CARBON STEEL

DURABLE. HEAT RETENTION

Carbon Steel has great durability and heat retention capability. Once thoroughly heated, the heavy-duty carbon steel cookware retains heat for a very long time, saving you a great deal of energy.

### PRESSED ALUMINIUM

LIGHT WEIGHT. QUICK HEAT DISTRIBUTION

Press aluminium utilizes compressive force to shape a cookware from a sheet of aluminium, the result is a very quick-heating cookware.

### CAST IRON

HEAT RETENTION. GREAT FOR SLOW COOKING

Cast Iron is one of the best materials in terms of heat retention and distribution. It is a common choice for professional chefs for long duration cooking. The material is incredibly durable.

### FORGED ALUMINIUM

EVEN HEAT DISTRIBUTION. CORROSION RESISTANT

Forged Aluminium is unique in shaping a thick base, evenly enhancing heat distribution of the cookware with no hot spots.

### HARD ANODIZED

HARDENED TO LAST. EXTRA DURABLE

Hard Anodized Aluminium is a hardened variant of aluminium with a very long life-span and scratch resistance. This is hands down the most durable cookware material available.

### CAST ALUMINIUM

HEAT RETENTION. ENERGY SAVING

Cast Aluminium can be moulded into a thick strategic shape for the best heat distribution and retention, saving you energy and giving you excellent durability.

### STONEWARE

STRONG AND DURABLE

Made from the most robust type of clay. Resistant to chipping, scratches and stains. Baked at 1300 °C. Excellent thermal resistance: it admits temperatures of -18 °C and +260 °C. Light weight. Perfect for daily use. Directly from the freezer to the oven. Avoid thermal contrasts

### STAINLESS STEEL

ENERGY SAVING. EVEN HEAT DISTRIBUTION

Stainless Steel is an exceptionally durable material that is virtually impossible to wear. Bonded with an aluminium capsuled bottom, it boasts satisfying heat conductivity.

### HARD ANODIZED

HARDENED TO LAST. EXTRA DURABLE

Hard Anodized Aluminium is a hardened variant of aluminium with a very long life-span and scratch resistance. This is hands down the most durable cookware material available.

### 18/10 STAINLESS STEEL

ENERGY SAVING. EVEN HEAT DISTRIBUTION

Stainless Steel is an exceptionally durable material that is virtually impossible to wear. Bonded with an aluminium capsuled bottom, it boasts satisfying heat conductivity.

### BOROSILICATE GLASS

THERMALLY TOUGHENED. PERFECT TRANSPARENCY

Borosilicate glass features perfect transparency and is toughened by thermal treatment. With its strength and heat resistance, this material is well suited for bakeware and other cooking utensils.

# COATING GUIDE

## BERGNER COATINGS

### CERA+

CERAMIC COATING. HEALTHY COOKING

Cera+ brings eco-friendly non-stick performance to today's cookware. The ceramic-based coating can stand extreme heat levels, and is ideal for low-fat cooking.

### PALLATIUM

ULTRA REINFORCED COATING

Pallatium is a three-coat, internally reinforced nonstick that outlast other coatings by 3.5x. Its basecoat is unusually hard while its topcoat is rich in fluoropolymers dedicated to release. Its remarkable durability makes it perfect for everyday use.

### SILVER+

ANTIBACTERIAL. ECO-FRIENDLY

Silver+ is the latest advancement of ceramic coating technologies. Combining eco-friendly performance and anti-bacterial functions, bacteria growth is effectively halted even after cleaning.

### TITANIUM

TITANIUM REINFORCED. ALL-ROUNDED RESISTANCE

Titanium coating is a multicoat that incorporates Titanium, giving it all-rounded resistance to almost anything like scratches and chemicals. It has all benefits of top quality ceramic coating, but many times harder.

### CERAMARBLE

STYLISH MARBLE LOOK. ECO FRIENDLY

CeraMarble is a natural step forward from the original Cera+. Sophisticated marble-style pattern is added to the surface of the coating with reinforced durability.

### ASTRON

EXTRA DURABLE. EXTRA EFFICIENT

Astron Ceramic Coating flaunts a dramatic holographic 3D finish, and is a scratch resistant non-stick surface reinforced by real nano diamond.

### DIAMOND

DIAMOND REINFORCED. EXTRA DURABLE

Diamond+ Coating is a breakthrough coating made with real shimmering diamond crystals. Diamond+ Coating features excellent durability for extended use. Featuring great non-stick capabilities for easy cooking and cleaning.

### ENAMEL

RUST PROOF. SCRATCH RESISTANT

Enamel Coating is essentially a vitreous enamel glaze that protects the cookware. It also gives you a cooking surface that is uniform and smooth and very easy to clean.

### GRANITE

HIGH HARDNESS. NATURAL GRANITE APPEARANCE

Granite coating goes beyond its attractive textured look. It gives you the benefits of cooking on hot stone - featuring high hardness, superior abrasion resistance and long-lasting non stick performance.

### MULTICLAD

LONG LASTING. EASY TO CLEAN

MultiClad is the cornerstone of the Bergner Non-Stick technology. True to its name, the MultiClad Non-Stick Coating is applied in multiple layers to achieve a more even and lasting release effect.

### MARBLE+

DURABLE. SCRATCH RESISTANT

Marble+ coating is an excellent non-stick layer with hardened performance. Cooking with the Marble+ coating is fun and easy, the excellent release capability will let you cook and clean efficiently.

### AQUALON

ECO-FRIENDLY

Aqualon is a new breed of water-based coating that gives you, for the first time on the market, excellent non-stick release function with an eco-friendly PFOA-free production.

### F4 QUANTANIUM COATING

COPPER + DIAMOND + SAPPHIRE + TITANIUM REINFORCED

4 PARTICLES combined to make one of the most resistant and exclusive non-stick surfaces on the market. Copper provides better conductivity. Diamond gives extra hardness. Sapphire brings an extra non-stick and Titanium offers an excellent durability.

### DYFLO 3D

HARDNESS + RESISTANCE + CONDUCTIVITY + DURABILITY

Dyflo 3D it is a special three-layer splash: High Hardness, high thermal transmission capacity and high resistance against scratches. Recommended for intensive use.

# COATING GUIDE

## SUPPLIERS COATINGS

### TEFLON™ PLATINUM

MOST ABRASION RESISTANT TEFLON™ COATING

The most scratch and abrasion resistant non-stick to date. It contains particles of an extremely hard mineral in a 3-layer structure of thickness >40 microns, so it can withstand metal utensils and even scouring pads.

PFOA CONTENT FREE  
HEAT RESISTANCE 220°C / 430°F

### TEFLON™ INFINITY

TEFLON™ COATING THAT LOOKS GOOD FOR LONGER

This non-stick coating is absolutely safe and harmless. Its extra smooth surface is perfect for oil-free cooking and cleaning after. It is extra durable for long-term use.

PFOA CONTENT FREE  
HEAT RESISTANCE 220°C / 430°F

### TEFLON™ SELECT

TEFLON™ COATING FOR EVERYDAY USE

This durable coating is intended for intensive use in busy kitchens. It features an advanced 3-layer coating system with thickness >35 microns, offering outstanding non-stick performance.

PFOA CONTENT FREE  
HEAT RESISTANCE 220°C / 430°F

### TEFLON™ XTRA

TEFLON™ COATING FOR CONVENIENCE

This economical coating is for cooks who value convenience. It gives you a surface which is easy to clean and with lasting non-stick performance. A smart choice for regular use.

PFOA CONTENT FREE  
HEAT RESISTANCE 220°C / 430°F

### PFLUON COOKMARK™

HIGH DENSITY. GREAT PRACTICALITY

Pflun Cookmark™ is a widely-used fluororesin non-stick coating that offers hardness, heat resistance, inadhesion and chemical resistance all in one, making any cookware easy to clean and use.

### Eterna™

Our longest lasting non-stick performance

Eterna coating is an unique technology, with 10x release capability and 3x durability compared to any coating. Its extreme toughness means it is safe to be used with metal utensils, and is 100% dishwasher safe.

PFOA CONTENT FREE  
HEAT RESISTANCE 260°C / 500°F

### QuanTanium™

Titanium-reinforced non-stick coating

QuanTanium is the first and only multi-coat non-stick with Titanium. With multiple layers, it out-performs all conventional coatings on scratch, abrasion, wear resistance - giving you a coating that stands up to almost anything.

PTFE CONTENT FREE  
PFOA CONTENT FREE  
HEAT RESISTANCE 260°C / 500°F

### Fusion™ HR

High-release sol-gel 'ceramic' non-stick coating

A sol-gel ceramic coating reinforced with titanium, with the durability and abrasion resistance no other sol-gel ceramic coatings can offer. It does not contain contaminating solvents and it can survive extreme heat.

PFOA CONTENT FREE  
PTFE CONTENT FREE  
HEAT RESISTANCE 455°C / 850°F

### Fusion™ Ti

Titanium-reinforced sol-gel 'ceramic' non-stick coating

New Fusion Titanium nonstick interior takes a giant step forward in durability and resistance to abrasion, far beyond any other sol-gel ceramic coating tested so far.

PFOA CONTENT FREE  
PTFE CONTENT FREE  
HEAT RESISTANCE 455°C / 850°F

### Xylan™ Plus

Reliable long-life non-stick coating

Xylan® is the economical nonstick coating with an attractive, glossy finish. Xylan® is dishwasher safe but also easy to be handwashed as it repels both water and grease.

PFOA CONTENT FREE  
HEAT RESISTANCE 260°C / 500°F

### Eclipse™

Hard reinforced non-stick coating

Eclipse® basecoat is unusually hard while its topcoat is rich in fluoropolymers dedicated to release. Its offering at least 10 times the durability makes it perfect for everyday use.

# COATING GUIDE

## SUPPLIERS COATINGS

### ILAG® PROFESSIONAL

TOUGH & DURABLE. PROFESSIONAL QUALITY

A high end 3-layer non-stick coating with a noble smooth surface and an excellent abrasion resistance. Its extraordinary long lasting non stick effect and scratch resistance makes it perfect for professional and most intensive use.

### ILAG® ULTIMATE

EXCEPTIONAL NON-STICK PERFORMANCE

Our "most use product" with an outstanding durability. Excellent combination of scratch and abrasion resistance. Very good non-stick properties. Developed for top Level cookware.

### ILAG® PREMIUM

HIGH RESISTANCE NON-STICK FOR DAILY USE

A versatile 3-coat system with a highly resistant top coat suitable for daily use. This coating has a good scratch and abrasion resistance with a very good non-stick effect. Suitable for healthy cooking methods with minimal greasing.

### ILAG® ESSENTIAL

2-LAYER NON-STICK FOR DAILY USE

A versatile 2-coat system with a top coat with good resistance against scratch and abrasion. Its good non-stick effect makes it suitable for simple daily use and healthy cooking methods with minimum greasing.

### WATER BASED COATING

6 LAYERS OF HIGH TECHNOLOGY

- 1- Stainless steel bottom for use with induction hobs and all other heat sources.
- 2- Water based double external coating.
- 3- 100% recycled aluminium base from items such as beverage cans, aluminium foil, etc.
- 4- Water based anchor coating.
- 5- Water based mid-coating with reinforced mineral particles.
- 6- Water based top coating.

This combination also eliminates the deformation of the products and increases their durability.

STAINLESS STEEL

## 5PLY COLLECTION

Your new cookware has it all. The resilient cookware can go on any type of stovetop, in the oven, in the broiler and on a grill.

## SELLING POINTS

- Five-ply copper core construction for the fastest heat-up times and the most precise temperature control
- Exposed copper ring promotes a seamless kitchen to table presentation
- Heavy-gauge stainless steel lid retains heat and nutrients
- Riveted, ergonomic stay-cool cast stainless steel handle
- Drip-free edge design
- Oven and broiler safe

## MATERIALS

### MULTI PLY

5-Ply bring together multiple layers of material including Aluminium and Stainless Steel. Heat conducts efficiently, keeping the entire cookware in its best performance.

One of the best materials in terms of heat retention and distribution. It is a common choice for professional chefs for long duration cooking. The material is incredibly durable.

CAST IRON

## UNIQUE COLLECTION

High-end cookware enameled. Shallow enough for high-heat searing and for slow-cooking.

## SELLING POINTS

- Superior heat distribution and retention
- Requires no seasoning and minimizes sticking
- Easy to clean. Resists dulling, staining, and chipping
- Self-basting lid designed to circulate steam and return moisture back to the food
- Oven safe up to 260°C
- Ergonomic knobs and handles
- Drain system

## MATERIALS

### CERA+ COATING

Cera+ brings eco-friendly non-stick performance to today's cookware. The ceramic-based coating can stand extreme heat levels, and is ideal for low-fat cooking.

### CAST IRON

Cast Iron is one of the best materials in terms of heat retention and distribution. It is a common choice for professional chefs for long duration cooking. The material is incredibly durable.

## COOKING

Suitable for cooking for all heat sources

## MATERIALS

**ILAG®  
PREMIUM**

A versatile 3-coat system with a highly resistant top coat suitable for daily use. This coating has a good scratch and abrasion resistance with a very good non-stick effect. Suitable for healthy cooking methods with minimal greasing.

**PRESSED  
ALUMINIUM**

Press aluminium utilizes compressive force to shape a cookware from a sheet of aluminium, the result is a very quick-heating cookware.

## COOKING

Suitable for cooking for all heat sources

PRESSED ALUMINIUM

# EARTH GREY COLLECTION

The new eco-friendly collection with a design inspired by grey colors and natural wood finish.

## SELLING POINTS

- Extra height
- Soft touch handle
- Easy and safe finger rest
- Compatible lids
- Stackability

your most special meals.

CAST IRON AND STONEWARE

## COOK & SHARE COLLECTION

Mini sizes come originally from the transformation of the traditional cooking range.

## SELLING POINTS

- Versatility
- Maintains Heat
- Virtually Indestructible
- No hot spots
- Heat distribution
- Oven safe

## MATERIALS

### STONEWARE

Made from the most robust type of clay. Resistant to chipping, scratches and stains. Baked at 1300 °C. Excellent thermal resistance: it admits temperatures of -18 °C and +260 °C. Light weight. Perfect for daily use. Directly from the freezer to the oven. Avoid thermal contrasts

### CAST IRON

Cast Iron is one of the best materials in terms of heat retention and distribution. It is a common choice for professional chefs for long duration cooking. The material is incredibly durable.

# PRESSURE COOKERS

---

A modern and scientific way of cooking and  
prepare your favourite recipes keeping all  
properties of the food intact.

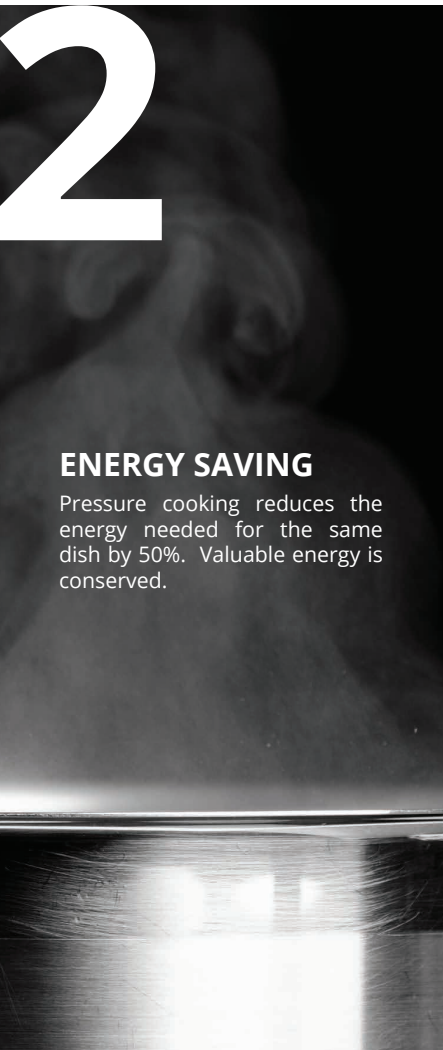

# BENEFITS OF PRESSURE COOKING

Speed isn't the only advantage of pressure cookers. Come and discover more!

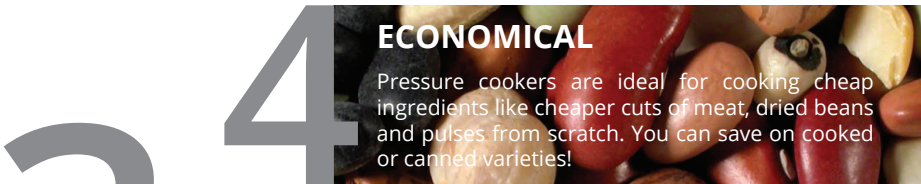

## SPACE SAVING

Besides pressure cooking, you can also fry, steam, boil... in a pressure cooker! You can now replace all your pots with just one good pressure cooker!

## ENERGY SAVING

Pressure cooking reduces the energy needed for the same dish by 50%. Valuable energy is conserved.

## ECONOMICAL

Pressure cookers are ideal for cooking cheap ingredients like cheaper cuts of meat, dried beans and pulses from scratch. You can save on cooked or canned varieties!

## TIME SAVING

Oxygen is expelled during cooking, this cuts cooking time by up to 70%.

STANDARD MODE **PRESSURE MODE**

	TYPE	WEIGHT	TEMP(F) /TIME(M)		TEMP(F) /TIME(M)	
	CHICKEN (WHOLE)	3-4 lbs	375	80	450	35
	CHICKEN (WHOLE)	5-6 lbs	375	120	450	40
	8 PCS BBQ CHICKEN	3-4 lbs	450	60	450	20
	CHICKEN BREAST FROZEN	1-2 lbs	450	45	450	10
	TURKEY (UNSTUFFED)	9-10 lbs	350	180	450	45
	ROAST BEEF (EYE ROUND)	6-7 lbs	325	150	450	50
	PRIME RIB	5-6 lbs	400	150	450	90
	BRAISED BEEF	4-5 lbs	325	210	375	150
	RIB EYE STAEK	10-12 oz.	450	15	450	10
	PORK ROAST (SHOULDER)	6-7 lbs	325	240	325	90
	FRESH HAM (SHANK)	10-11 lbs	350	240	350	180
	PORK LOIN	4-5 lbs	325	75	450	35
	SALMON FILLET	9-10 oz.	450	10	450	8
	LENTILS	1 cup (dry)		45		10
	SPLIT PEAS	1 cup (dry)		45		5
	BLACK EYED BEANS	1 cup (dry)		60		15
	CHICKPEAS	1 cup (dry)		180		30
	KIDNEY BEANS	1 cup (dry)		90		30

Natural colours of foods are preserved with the gentler cooking way. It prevents splitting of delicate vegetables that freshness of your ingredients is well retained.

# 5

## UNIQUE FLAVOURS

Food tastes more authentic as original flavours and aroma are preserved. With steam kept inside pot during cooking, food is kept moist, and high heat caramelizes food to create unique flavours.

# 7

## SAFE AND EASY TO CONTROL

Pressure cooking is safe and easy to master. With multiple safety controls, extra steam is released automatically so there is no spillage or boiled-dry pots!

Sit back and simply wait for your food to be cooked without trips to check on your dish!

# 8

## NUTRIENT-CONSERVING

Cooking in an airtight closed system preserves the valuable vitamins and minerals.

## GREATER DIGESTIBILITY

Cooking with pressure increases protein digestibility as it reduces phytic acid and lectins. This makes legumes and grains easier to be ingested.

# 10

## NO HARMFUL SUBSTANCES

High temperature cooking usually produces harmful substances including carcinogenic compounds. Pressure cooking method does not give off harmful substances.

# WHY BUY PRESSURE COOKER?

## WHY BUY

## PRESSURE COOKER

### EFFICIENCY

-70% cooking time  
Energy efficient  
Saves cost

### FLAVOUR

Aromas, moisture, flavours preserved

### NUTRITION

Nutrients of food preserved

### SAFETY

Care needed with the use of pressure

### CONTROL

Need to adjust settings before cooking  
Need to discharge pressure with care  
Pot locked during cooking

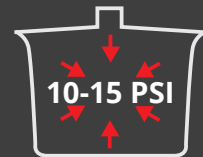

### DURABILITY

Can replace worn parts to extend life  
Parts need to be hand-washed

## WORKING PRESSURE

Works with airtight system. Pressure speeds up cooking, saving time + energy.

MAX TEMP  
<115°C

### AIRTIGHT SYSTEM

# CHOOSING A GOOD COOKER

The days of dangerous pressure cooker is far gone! Let us guide you through choosing a good pressure cooker.

## EASY TO USE

A good cooker must be one that you can use with ease and comfort.

At Bergner, we go great lengths to make sure our designs are easy to understand. You will find using our cookers a pleasure as our lids are easy to place and lift, our switches are easy to operate, and our knobs and handles are of ergonomic shapes.

## WHICH SAFETY FEATURES TO LOOK OUT FOR?

Multiple safety valves:  
In case of failure of any of the valves, pressure can be released safely through alternative valve(s).

**Lockable handle** - can be manually locked, only when cooker is locked pressure starts to ensure safe cooking

Indicator which shows pressure level visually.

Extra safety feature like safety window is always a bonus

## EASY TO MAINTAIN

Good cookers should be easy to clean, being dishwasher-safe will be a bonus. Detachable parts also extends working life, as parts can be separated for washing and replaced.

Resistant to  
• corrosion  
• abrasion

## PRACTICAL MATERIAL

A stainless steel cooker stays bright, hygienic, durable, and it has great resistance to corrosion and scratches.

It is important to have an aluminium encapsulated base as it increases heating speed and evenness significantly.

## SIDE HANDLE OR LONG HANDLE?

Choosing a long handle or side grip model depends on your cooking preferences.

Long handles are safe to operate

Double side handles gives you security in lifting especially if the contents are heavy

## DO I NEED 2 COOKING LEVELS?

### Powerful level

Fast + energy saving  
Caramelizes food for extra flavours  
✓ long-cooking time recipes  
✓ stews  
✓ braising  
✓ soups

**2**  
Pressure  
LEVELS

**Gentle level** keeps food at their best appearance

✓ delicate foods  
✓ beans, vegetables

## WHAT IS THE IDEAL WORKING PRESSURE?

A minimum of 100 KPa will be ideal as most recipes require this pressure.

## WHICH CAPACITY?

The choice of capacity should depends on the portion one cooks. Berghner offers capacities ranging from 4L to 8L.

4-6L are for small quantities, smaller pans shorten cooking time  
✓ frying  
✓ direct cooking with pan

6-8L are for large quantities and for food that needs more space of circulation  
✓ soups ✓ stews

## DO I NEED AN INDUCTION READY BASE?

An induction bottom enables cooking on induction cook tops, and also all other heat sources. It gives maximum flexibility.

STAINLESS STEEL

## CRETA

Creta mixes a traditional design with best safety systems. It has a total security system combined with an open-prevention valve.

## PRACTICAL DESIGN

- 1** Friction bonded, aluminium encapsulated **induction bottom** for even heating, all heat sources

- 2** Silicone sealing ring

- 3** Stay cool handles - comfortable and safe to grip

- 4** Push button locks the lid with a click when lid is in right position it clicks close, push button to release the lock

- 5** Open-prevention valve when desired pressure level is reached it pops up it and pot will be locked

- 6** Pressure regulating valve doubles as a safety valve - lets off steam automatically if pressure rises above safe level

- 7** Safety window (on side of lid): sealing ring will be squeezed out from safety window if valves fail

WORKING PRESSURE  
= 100kPa

**2**  
can be separated from pot to be cleaned thoroughly

## WHY CRETA?

### QUALITY & SAFETY GUARANTEED

Resistant to  
• corrosion  
• abrasion

Our product passed European safety tests and is certified to be safe

Made of 18/10 premium grade steel - durable & easy to clean

### TOTAL SECURITY SYSTEM

Push button locks the lid with a click

### MEASURING SCALE INSIDE

Measure and fill in one

STAINLESS STEEL

EBRO

Ebro features a 3-step pressure indicator: it shows the level of pressure inside your pot with clarity, and releases excess steam.

## PRACTICAL DESIGN

- 1 Pressure regulating valve** turn rotary switch to build and release pressure, 2 preset cooking levels

- 2** Friction bonded, aluminium encapsulated **induction bottom** for even heating, all heat sources

- 3** Silicone sealing ring

- 4** Stay cool handles comfortable and safe to grip

- 5** Push button locks the lid with a click  
When lid is in right position it clicks close, push button to release the lock

- 6** Open-prevention valve when desired pressure level is reached it pops up it and pot will be locked

- 7** Pressure regulating valve doubles as a safety valve lets off steam automatically if pressure rises above safe level

- 8** 3-step pressure indicator displays pressure level precisely to ensure safety of use

LOW = 60KPa  
HIGH = 100KPa

**1 3 7**  
parts  
can be  
separated  
from pot  
to be  
cleaned  
thoroughly

## WHY EBRO?

### QUALITY & SAFETY GUARANTEED

Resistant to  
• corrosion  
• abrasion

Our product  
passed European  
safety tests and  
is certified to be  
safe

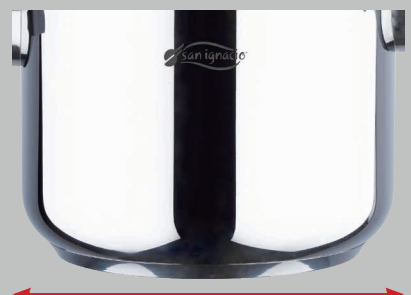

Made of 18/10  
premium  
grade steel -  
durable & easy  
to clean

STAINLESS STEEL

CORDOBA

si®

If you like traditional cooking, this pressure cooker is perfect to you. Thanks to his pressure regulator makes cooking so simple.

## PRACTICAL DESIGN

**1 Knob:** turn to loosen or tighten lid urn knob following arrow to secure lid on pot

**2 Induction bottom** aluminium encapsulated for even heating, for all heat sources

**3 Silicone sealing ring**

**4 Stay cool handles** comfortable and safe to grip

**5 Stay cool pressure regulatore** easy to use: place cap on vent to seal pot for building pressure, lift to release pressure

**6 Measuring scale** etched inside - measure and fill in one

**7 Safety valve** lets off steam automatically if pressure rises above safe level

**8 Pressure regulating valve** doubles as a safety valve lets off steam automatically if pressure rises above safe level

## WHY CORDOBA?

### QUALITY & SAFETY GUARANTEED

Resistant to  
• corrosion  
• abrasion

Our product passed European safety tests and is certified to be safe

Made of 18/10 premium grade steel - durable & easy to clean

### 1 HAND - EASY OPEN

Operate with one hand - turn knob to unlock then slide lid outward to open

### 1 STEP PRESSURE CONTROL

Stay-cool material: safe to use

# KNIVES

A wide propouse of knives elaborated in the most resistant and durability materials to meet a precise and effortless cutting.

## Ham Knife

It has a long, thin, flexible blade with a smooth edge  
Ideal for cutting thin slices of meat.

## Chef Knife

It has a board and strong blade.  
Multipurpose for cutting and chopping.

## Slicer Knife

Its very fine cutting edge, designed for carving all kinds of grilled meat.

## Bread Knife

It has a large and strong blade with special serrated edge. It cuts into the crust effortlessly.

## Santoku Knife

It has scallops on its board blade to reduce sticking of foods during cutting. Multipurpose for cutting, slicing and chopping.

## Chopper Knife

It has an extra wide edge that is thin at the tip and thick at the base. Great for chopping rigid ingredients.

## Utility Knife

It has a small strong blade with smooth edge.  
Suitable for many tasks such as peeling and cutting.

## Paring Knife

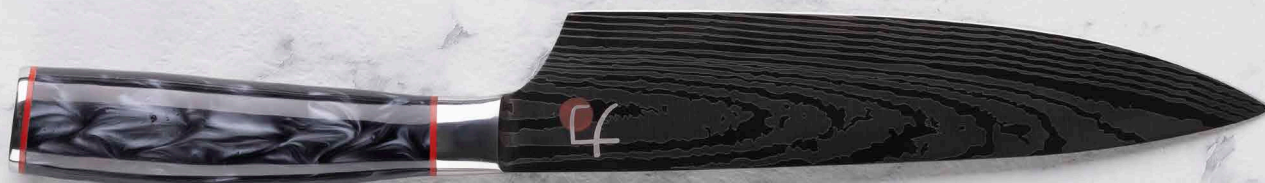

It is a lightweight knife with sharp point for small intricate work such as peeling.

STAINLESS STEEL

## TETSU COLLECTION

These pieces include professional-quality essentials that serve as the cornerstone for cooking like a true Japanese chef.

## SELLING POINTS

## COFFEE & TEA

---

Complete your kitchen with this wide selection  
of the best accessories to prepare and enjoy  
the drink you love most.

A top-down view of various coffee-making items arranged on a dark grey surface. There are three moka-style coffee makers: one black, one stainless steel, and another black one with its lid open. A small white cup of coffee with a dusting of powder sits in the bottom right. A spoon with white powder is next to it. Several cinnamon sticks are scattered near the top. A grey fabric strap is draped across the middle. Small white granules are scattered in several areas.
