

#117

2-PLY 220# 1/8 X BARE APACHE POWERCLEAT™ WITH 1/2" HIGH X 6" OVERALL WIDTH MOLDED CRESCENTS

FEATURES

The Apache PowerCleat™ is a 1/2" crescent cleat profile, designed to significantly increase carrying capacity when compared to conventional multi-chevron belts. The cleat height and crescent profile allow for greater conveyor incline angles over a larger variety of applications and conveyed product. The crescent shape was designed for better flex when discharging, allowing for a cleaner discharge of material with less carryback. Additionally, the overlapping pattern creates less noise and chatter on return rollers.

APPLICATIONS

- Recycling
- Road Construction
- Wood Processing
- Grain Handling
