

#4379

1-PLY 150# PLASTIC MESH ZIPLINK TAN DIAMOND TOP X BARE

FEATURES

ZipLink belt features a blue carboxilated nitrile rougtop on a polyester monofilament spiral-link mesh carcass. The ZipLink design eliminates mechanical lace and replaces time-consuming, costly vulcanized endless splices. Features a longer service life due to no "weak link," eliminating failures common to other splices. The diamond top provides positive grip on steep inclines and declines. This belt is easily spliced on-site to any length or supplied with prepared ends for quicker installation. Troughable and easily tracked when a tough, endless belt is needed.

APPLICATIONS

- Incline
- Decline
- High Grip

SPECIFICATIONS

Plies	1
Working Strength	150
Color	Tan
Material	Natural SBR
Carcass	Plastic Mesh
Top Cover	Impression
Bottom Cover	Bare
Thickness	0.285"
Weight PIW	0.125
Min. Pulley Diameter	4"
