SAVE TIME AND MONEY ON MANAGING INVENTORY AND UPTIME

Mi Inventory Management Solutions is a comprehensive program that increases efficiencies and savings from your inventory and assets by leveraging technology, experience, processes, and professional resources.

Mi STOREROOM TECHNOLOGY

- RFID Storerooms
- Point-of-use Vending Solutions
- Vendor Managed Inventory
- Storeroom Management
- Storeroom Assessment & Optimization

RFID TECHNOLOGY

We utilize radio frequency identification technology to manage storeroom inventory levels, durable assets, and critical spares.

- Improves MRO accuracy
- Secure gated entry requires authentication
- Integration capability
- Customer can define issue process
- Automate the reorder process
- Control and accountability 24/7/365

VENDOR MANAGED INVENTORY

We offer automated MRO Inventory Mgmt. Solutions that provide accurate storeroom inventories, streamlined data entry, process efficiencies, and operational savings.

Features:

- Parts replenishment program using barcode scanning technology
- Supports 'keep fill' and point-of-use inventory replenishment
- Electronic upload to Motion's order fulfillment system
- Accommodates Motion core and non-core products

Benefits:

- Access to 6.9 million parts
- Streamlines transactions
- Eliminates data entry
- Speeds part replenishment
- Promotes accurate order fulfillment
- Provides activity/usage reporting
- Reduces customer labor costs
- Quickly captures simple re-order points
- Provides cost savings
- Improves efficiencies
- Bar code replenishment via mobile app

REPAIR & WARRANTY

We track the warranty period and scheduled maintenance on repairable spare assets, as well as the frequency and number of repairs, to help you save money over the product cycle.

Features:

- Manages items outsourced for repair
- Tracks assets and associated warranties
- Provides direct operational savings and improves production efficiencies (trend analysis)
- Single data source accessible by authorized employees via Motion.com
- Technical resources available to evaluate and recommend asset improvement solutions

Benefits:

- Identify and track repair frequency/trends
- Improve production efficiencies
- Improve mean time between failures
- Lower repair costs
- Track and report outsourced repairs and manufacturers' warranties on new items
- Provide easily customizable reports that can be exported
- In-house repair capability at Motion's 40+ Service Centers
