■ HABA® is natural!

HABA® uses woods from sustainable forestry. Suppliers are PEFC* certified. The natural and mechanical characteristics of beech and maple wood, in combination with a design of clear colors and shapes are the most suitable for a great, heirloom quality toy.

When it comes to applying colors, we only use water-based ecologically friendly, solvent-free lacquers. Multiple lacquer layers render the surface extremely resistant to humidity and wear and tear, allowing the toy to be taken from the hand to the mouth, at any time.

The quality of the lacquers is insured, apart from independent controls, by the long-term partnerships we have strongly established with certified suppliers.

* PEFC = Programme for the Endorsement of Forest Certification schemes. The aim of the organization is to improve sustainable forestry and the maintenance and ecological balance of forests.

Germany

■ HABA® "Made in Germany!"

Our wooden baby toys, rattles, teething rings and many of our wooden games are still manufactured in Bad Rodach, Germany where HABA's worldwide headquarters are located. The wealth of experience coupled with the latest technologies guarantee the consistent high quality of our products. The items made in Germany are indicated by an icon in this catalog.

■ HABA® meets childrens' needs!

Our play "inventors" and designers at HABA® put great care and thought into the creation of games, toys and accessories. Parents themselves, they are sensitive to the needs of our children. Their ideas are transformed by the use of materials which undergo continuous controls and careful inspection. Naturally, our toys comply, and often exceed, safety standards!

■ HABA® is family owned!

HABA remains a family owned and operated company. Our German design department includes eight product designers and nine game authors who annually develop over 150 new ideas for games, furniture and toys which are sold in over 50 countries. The special attention to detail makes each and every one of the HABA products unique!

CLEVER UP! BUILDING BLOCKS SYSTEM

Nature at its best, fulfilling a child's two natural needs:
1) Imitating Grown-Ups and 2) Constructing Things

Children use building blocks to playfully shape the space around them and at the same time begin to grasp the concept of a 3rd dimension. Through constant repetition and trial & error, they acquire an empirical understanding of the laws of physics.

Clever Up! Is a 4 set system. Each set adds another shape/s to add complexity.

- 1.0 Cubes, Baseplates & Slats
- 2.0 Cubes, Baseplates, Slats & **Large Rectangles**
- 3.0 Cubes, Baseplates, Slats, Large Rectangles & **Small Rectangles & Rods**
- 4.0 Cubes, Baseplates, Slats, Large Rectangles, Small Rectangles, Rods & **Triangles & Perforated Slats & Spheres**

Each of the Clever Up! Block Sets include two added value items for the parents:

1. Strong, two handle cloth storage bag
2. An in-depth, 38 page full color idea booklet that teaches the parent step-by-step how blocks help a child's physical and intellectual development. The booklet begins with the basics by explaining the value of infant & toddlers playing with blocks, but then takes the parental education to the next level for budding architects, mathematicians, programmers and engineers.
